PAKEWAY DDJD01-US

PAKEWAY Pet Nail Clipper User Manual

Model: DDJD01-US

1. PRODUCT OVERVIEW

The PAKEWAY Pet Nail Clipper is an advanced grooming tool designed for safe and efficient nail trimming for cats, dogs, rabbits, and other small animals. It features an integrated LED light to illuminate the pet's nail quick, preventing accidental over-cutting, and a UV light for detecting ringworm on pet skin. The clipper is constructed with high-quality stainless steel blades and an ergonomic, non-slip handle for comfortable and precise use. It is rechargeable via USB, offering extended battery life.

2. SAFETY INFORMATION

- **Safety Lock:** The clipper is equipped with a safety lock mechanism. To open, push the lock into place and pull it outward. To close, push down again until it locks. This prevents accidental opening and potential injury, especially from sharp blades.
- **Avoid Over-Cutting:** Always use the integrated LED light to clearly identify the bloodline (quick) within your pet's nail. Only trim the very tip of the nail, staying a safe distance from the quick to prevent pain and bleeding.
- **Child Safety:** The built-in child lock prevents children from being accidentally injured by the sharp cutting head. Store the clipper in a secure location out of reach of children.
- **Proper Handling:** Hold the clipper firmly by the ergonomic, non-slip handle during use to ensure stability and control.

One button lock

It can be used for half a year with one full charge.

3. SETUP AND CHARGING

1. **Initial Charge:** Before first use, fully charge the nail clipper. The device comes with a USB charging cable.
2. **Charging Process:** Locate the USB port on the clipper. Insert the charging cable into the port and connect the other end to a compatible USB power source (e.g., computer, power bank, wall adapter).
3. **Battery Life:** A full charge can provide power for up to half a year of typical use, depending on frequency.

4. OPERATING INSTRUCTIONS

4.1. Nail Trimming with LED Light

1. **Prepare Your Pet:** Ensure your pet is calm and comfortable. Gently hold their paw.
2. **Activate LED Light:** Slide the switch on the clipper to activate the bright LED light.
3. **Locate the Quick:** Position the clipper so the LED light illuminates the nail. The light will help you clearly see the bloodline (quick) inside the nail, which appears as a pink or dark area.
4. **Trim the Tip:** Carefully trim only the clear, non-vascular tip of the nail, staying a safe distance from the quick. The sharp, angled stainless steel blade ensures a clean cut.
5. **Repeat:** Repeat for all nails as needed.

4.2. Using the UV Light for Ringworm Detection

1. **Activate UV Light:** Slide the switch on the clipper to activate the UV lamp beads.
2. **Inspect Pet Skin:** Directly irradiate your pet's skin with the UV light.
3. **Observe for Fluorescence:** If the skin emits a specific fluorescence (often a greenish glow), it may indicate the presence of ringworm or other fungal infections. Consult a veterinarian for proper diagnosis and treatment if fluorescence is observed.

Image: The UV light feature being used to inspect a pet's fur, demonstrating its capability to detect potential skin issues like ringworm.

5. MAINTENANCE

- **Cleaning:** After each use, wipe the stainless steel blades with a clean, dry cloth to remove any nail debris. For thorough cleaning, a small amount of pet-safe disinfectant can be applied to the blades and then wiped dry.
- **Storage:** Always engage the safety lock before storing the clipper. Store in a dry place, away from direct sunlight and extreme temperatures.
- **Blade Sharpness:** The high-quality stainless steel blades are designed for durability and sharpness. If the blades become dull over time, consider replacing the clipper for optimal performance and to prevent discomfort to your pet.

High-Quality Stainless

Steel Sharp Blades The Curved Incision
Perfectly Fits the Cat's Nails
