SEB MLX0A01425

KRUPS Coffee Machine Water Tank MS-0A01425 Instruction Manual

Model: MLX0A01425 (Part No. MS-0A01425)

1. Introduction

This manual provides essential information for the proper installation, operation, and maintenance of your new water tank. This water tank, model MLX0A01425 (also known as part number MS-0A01425), is a compatible replacement part manufactured by SEB for various KRUPS espresso coffee machines.

Compatible KRUPS Models include:

- ARABICA LATTE
- ESPRESSERIA AUTOMATIC
- ESPRESSERIA AUTOMATIC HAPPY
- ESPRESSERIA QUATTRO FORCE
- LATT'ESPRESS QUATTRO FORCE

Please read these instructions carefully before use to ensure optimal performance and longevity of the product.

2. Safety Instructions

Always observe basic safety precautions when handling coffee machine components. Failure to do so may result in injury or damage to the appliance.

- Ensure the coffee machine is **unplugged** from the power outlet before installing or removing the water tank.
- Do not use the water tank if it is visibly damaged or cracked.
- Only fill the tank with fresh, cold drinking water. Do not use other liquids.
- Keep the water tank out of reach of children.
- Avoid using abrasive cleaning agents or harsh chemicals on the tank, as this may damage the plastic.

3. Product Overview

The water tank is a transparent plastic reservoir designed to hold water for your espresso machine. It features a

removable design for easy filling and cleaning.

Figure 1: Front view of the water tank. This image shows the clear plastic body, the dark grey top cover, and the internal structure including the water intake and level indicator.

Figure 2: Side view of the water tank. This image highlights the integrated handle on the top for easy carrying and the water outlet mechanism at the bottom.

Figure 3: Alternative side view of the water tank. This perspective further illustrates the tank's slim design and the internal water filter housing or intake mechanism.

4. Setup and Installation

1. **Unplug the Machine:** Before beginning, ensure your KRUPS coffee machine is turned off and unplugged from the electrical outlet.
2. **Remove Old Tank (if applicable):** If replacing an existing tank, carefully pull the old water tank upwards and out of its housing.
3. **Prepare New Tank:** Rinse the new water tank with fresh water before its first use.
4. **Insert New Tank:** Align the new water tank with the designated slot on your coffee machine. Gently push it down until it is firmly seated. You should feel it click into place or sit securely without wobbling.
5. **Fill with Water:** Remove the tank from the machine, fill it with fresh, cold drinking water up to the MAX fill line, and then reinsert it securely.
6. **Plug In Machine:** Once the tank is securely in place and filled, you may plug your coffee machine back into the

power outlet.

5. Operating the Water Tank

The water tank is designed for straightforward use as part of your coffee machine's operation.

5.1. Filling the Water Tank

1. Grasp the water tank by its handle and lift it out of the coffee machine.
2. Open the lid (if applicable) or fill directly through the top opening.
3. Fill the tank with fresh, cold drinking water. Do not exceed the maximum fill line indicated on the tank. The capacity is approximately 1 Litre.
4. Carefully place the filled water tank back into its position in the coffee machine, ensuring it is fully seated.

5.2. Monitoring Water Level

The transparent design of the tank allows for easy monitoring of the water level. Refill the tank when the water level is low to prevent the machine from running dry, which can damage the pump.

6. Maintenance and Cleaning

Regular cleaning of the water tank is crucial for hygiene and to ensure the best taste for your coffee.

6.1. Daily Cleaning

- After each use or at the end of the day, empty any remaining water from the tank.
- Rinse the tank thoroughly with fresh, clean water.
- Allow the tank to air dry or wipe it with a clean, soft cloth before refilling.

6.2. Weekly Cleaning

- Remove the water tank from the machine.
- Wash the tank with warm water and a small amount of mild dish soap.
- Use a soft brush or sponge to clean the interior, paying attention to corners and crevices.
- Rinse thoroughly multiple times to ensure no soap residue remains.
- Do not wash the water tank in a dishwasher, as high temperatures can deform the plastic.

6.3. Descaling

While the water tank itself does not require descaling, it is important to regularly descale your coffee machine according to its specific instruction manual. Using filtered water in the tank can help reduce limescale buildup in the machine.

7. Troubleshooting

If you encounter issues with your water tank, refer to the following common solutions:

Problem	Possible Cause	Solution
Water tank is leaking.	Tank not seated correctly, or tank is cracked.	Remove and reinsert the tank, ensuring it is fully seated. Inspect the tank for any visible cracks or damage. If damaged, replace the tank.
Coffee machine indicates low water despite tank being full.	Tank not fully seated, or internal sensor issue (less likely for tank itself).	Ensure the tank is pushed down completely into its housing. If the problem persists, consult your coffee machine's main instruction manual or contact KRUPS customer support.
Water tastes unusual.	Tank not cleaned regularly, or old water.	Empty and thoroughly clean the water tank as per the "Maintenance and Cleaning" section. Always use fresh, cold water.

8. Specifications

Manufacturer: SEB INTERNATIONAL

Brand (Compatible with): KRUPS

Model Number: MLX0A01425

Part Number: MS-0A01425

Material: Plastic

Capacity: 1 Litre

Color: Transparent (Nc - Not specified, but visually clear)

Item Weight: Approximately 497 g

Special Feature: Removable tank

Country of Origin: China

9. Warranty and Support

This water tank is a replacement part. For warranty information regarding your KRUPS coffee machine, please refer to the original appliance's instruction manual or contact KRUPS customer service directly.
For support concerning this specific water tank, please contact the seller or manufacturer (SEB INTERNATIONAL) through your purchase platform.
