## Dyson TP07

# Dyson Purifier Cool™ TP07 Smart Air Purifier and Fan

Model: TP07 | Brand: Dyson

### PRODUCT OVERVIEW

The Dyson Purifier Cool™ TP07 is designed to automatically sense, capture, and trap pollutants for cleaner air, while also providing intelligent purification and cooling. It is fully sealed to HEPA H13 standard, ensuring that what goes inside stays inside. Utilizing Air Multiplier technology, it projects purified air throughout the entire room. The device reports real-time air quality on its LCD screen and via the MyDyson app, offering both fan mode for direct cooling and backward airflow mode for purification without cooling. It also features convenient filter-life notifications, a programmable timer, and quiet night mode operation.

## SETUP GUIDE

---

### 1. Unboxing and Placement

Carefully remove all components from the packaging. Place the Dyson Purifier Cool™ TP07 on a stable, level surface, ensuring adequate space around the unit for optimal airflow. Avoid placing it directly against walls or in corners that might obstruct air intake or output.

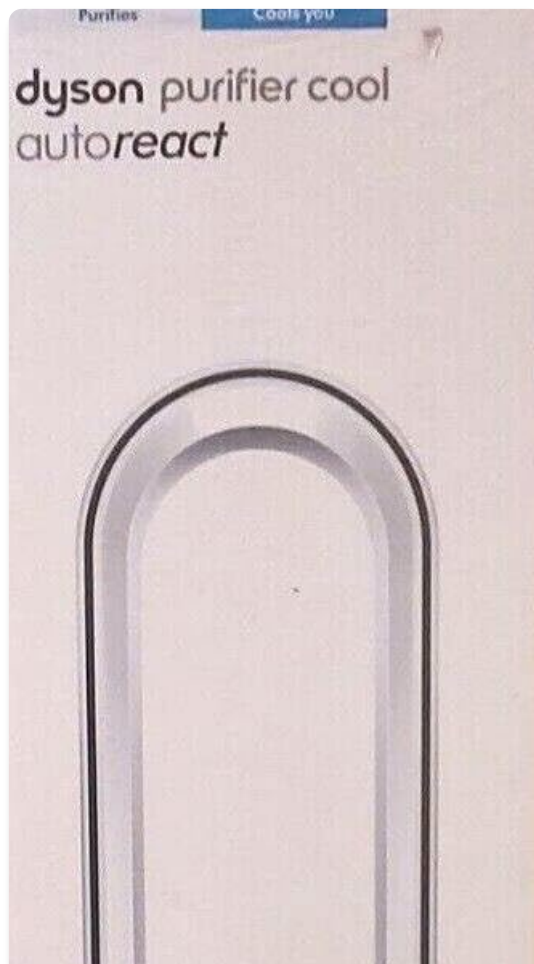

Figure 2: Optimal placement for effective air purification and circulation.

## 2. Filter Installation

The Dyson Purifier Cool™ TP07 comes with a combination HEPA and activated carbon filter. To install or replace the filter:

1. Ensure the machine is unplugged and turned off.
2. Press the two release buttons on either side of the filter cover.
3. Remove the outer filter cover.
4. Carefully remove the old filter (if replacing).
5. Place the new filter into the base unit, aligning it correctly.
6. Reattach the filter cover, pressing firmly until it clicks into place.

## OPERATING INSTRUCTIONS

---

The Dyson Purifier Cool™ TP07 can be operated using the included remote control, the MyDyson app, or compatible voice services.

### 1. Remote Control Functions

The remote control allows you to manage various settings. It can be magnetically stored on top of the loop amplifier when not in use.

- **Power On/Off:** Press the power button ( ) to turn the machine on or off.
- **Fan Speed:** Use the '+' and '-' buttons to adjust the airflow speed (1-10).
- **Oscillation:** Press the oscillation button ( ) to enable or disable oscillation and adjust the oscillation angle.
- **Auto Mode:** Press the 'AUTO' button. The machine will automatically monitor air quality and adjust

settings accordingly.

- **Night Mode:** Press the crescent moon button (☾) for quiet operation with a dimmed display.
- **Timer:** Set a sleep timer for the machine to turn off after a pre-set interval (30 minutes to 8 hours).
- **Information:** Press the 'i' button to cycle through air quality information on the LCD screen.
- **Airflow Direction:** Use the directional arrows to adjust the angle of airflow.

## 2. MyDyson App & Voice Control

For enhanced control and monitoring, download the MyDyson app. The app allows you to:

- Monitor real-time air quality from anywhere.
- Control machine settings remotely.
- Receive filter-life notifications.

- Access detailed reports on air quality history.

The Dyson Purifier Cool™ TP07 is also compatible with voice services such as Amazon Alexa, Apple Siri, and Google Home for hands-free operation.

## MAINTENANCE

---

### 1. Filter Replacement

The filter life varies depending on usage and air quality. The machine's LCD screen and the MyDyson app will provide automatic notifications when the filter needs to be changed. Refer to the "Setup Guide" section for detailed filter replacement instructions.

### 2. Cleaning

To maintain optimal performance, regularly wipe the machine with a dry or damp cloth. Do not use detergents or polishes. Ensure the air intake holes on the base are clear of dust and debris.

## TROUBLESHOOTING

---

If your Dyson Purifier Cool™ TP07 is not operating as expected, consider the following common issues:

- **No Power:** Ensure the power cord is securely plugged into both the machine and a working electrical outlet.
- **Poor Airflow/Purification:** Check if the filter needs replacement (indicated by notifications on the LCD screen or app). Ensure air intake holes are not blocked.
- **Unusual Noise:** Verify that the filter is correctly installed and the machine is on a stable, level surface.
- **Remote Not Working:** Check the battery in the remote control. Ensure there are no obstructions between the remote and the machine.

For persistent issues, refer to the full user manual or contact Dyson customer support.

## SPECIFICATIONS

<b>Brand</b>	Dyson
<b>Model</b>	TP07
<b>Color</b>	White/Silver
<b>Product Dimensions</b>	7.7"D x 8"W x 41"H
<b>Item Weight</b>	11 pounds
<b>Floor Area</b>	99 Square Feet
<b>Specification Met</b>	Certified HEPA
<b>Noise Level</b>	78 dB
<b>Particle Retention Size</b>	0.1 Micron
<b>Controller Type</b>	Android, iOS, Amazon Alexa, Remote, Google Assistant, Siri
<b>Included Components</b>	Dyson Genuine Filter, Dyson Purifier Cool™ TP07, Remote Control
