Korkmaz A225 Aqua Turkish Teapot Set Instruction Manual

MODEL: A225

1. Product Overview

The Korkmaz A225 Aqua Turkish Teapot Set is a versatile kitchen appliance designed for brewing tea, filter coffee, and herbal infusions. Crafted from high-quality 18/10 Cr-Ni grade stainless steel, this set emphasizes durability and functionality. Its super capsule base ensures homogeneous heat conduction, providing efficient heating and energy saving across various stovetops.

Key features include:

- **Three-in-One Functionality:** Suitable for brewing traditional Turkish tea, filter coffee, or herbal tea using the integrated French press mechanism.
- **Premium 18/10 Stainless Steel:** Ensures long-lasting use, hygiene, and resistance to rust or fading when properly maintained.
- **Super Capsule Base:** Provides optimal heat transfer, retains heat for extended periods, and is compatible with all stove types, including induction.
- **Ergonomic Metal Handles:** Designed with insulating material to prevent excessive heat transfer, allowing for comfortable and safe handling.

2. Components

The Korkmaz A225 Aqua Teapot Set consists of four main components:

- **1 Bottom Pot:** The larger pot for boiling water. Capacity: 1.58 Quarts (1.5 Liters).
- **1 Top Teapot:** The smaller pot for brewing tea or coffee. Capacity: 0.95 Quarts (0.9 Liters).
- **1 Intermediate Lid:** A standard lid for the top teapot.
- **1 French Press Lid:** A specialized lid with a press mechanism for brewing coffee or herbal tea.

The perfect teapot set contains 4 pieces

3. Setup

The Korkmaz A225 Aqua Teapot Set comes fully assembled and ready for use. Before first use, please follow the initial cleaning instructions in the Maintenance section.

3.1. Converting the French Press Lid

The French press lid can be converted into a regular teapot lid for traditional tea brewing. Instructions for this conversion and an extra screw are included with the product. Refer to the separate leaflet for detailed steps on converting the lid.

4. Operating Instructions

4.1. Stovetop Compatibility

This teapot set is designed for use on various stovetops, including:

- Gas stove

- Electric stovetop
- Ceramic stove
- Halogen cooktop
- Induction stoves

4.2. Brewing Tea (Traditional Method)

1. Fill the bottom pot with water and place it on your chosen stovetop.
2. Place your desired amount of tea leaves into the top teapot.
3. Once the water in the bottom pot boils, pour some of the hot water into the top teapot over the tea leaves.
4. Place the top teapot back onto the bottom pot. Reduce heat to low and allow the tea to steep for 15-20 minutes, or until desired strength is achieved.
5. Serve by pouring tea from the top teapot and diluting with hot water from the bottom pot to your preference.

4.3. Brewing Coffee or Herbal Tea (French Press Method)

1. Ensure the French press lid is attached to the top teapot.
2. Add coarse ground coffee or herbal tea to the top teapot.
3. Boil water in the bottom pot.
4. Pour hot water from the bottom pot into the top teapot, ensuring all grounds are saturated.
5. Let steep for 3-5 minutes for coffee, or according to herbal tea instructions.
6. Slowly press the plunger down to separate the grounds from the brewed liquid.
7. Serve immediately.

5. Maintenance and Care

Proper care will ensure the longevity and continued aesthetic appeal of your Korkmaz A225 Aqua Teapot Set.

5.1. Before First Use

Clean the teapot set thoroughly with hot water and dish soap before its initial use.

5.2. Daily Cleaning

- Use liquid dishwasher detergents for cleaning.
- **DO NOT RUB** the teapot set's surface with wire or any other hard cleaning materials, as this may scratch the surface and diminish its brightness.
- The product is dishwasher safe. However, depending on the detergent used, washing it in the dishwasher may fade its glossy surface over time. Hand washing is recommended to preserve its high-polished attractive exterior.

5.3. Important Safety and Usage Notes

- **DO NOT LEAVE** your teapot set on fire without water in any circumstances, as this can cause damage.

- The metal handles are designed with insulating material to prevent them from becoming excessively hot. However, always exercise caution when handling hot items.

5.4. Removing Spots and Lime Scales

To clean spots and lime scales that may occur inside the stainless steel products, you can boil water with lemon juice, vinegar, or citric acid.

6. Troubleshooting

The Korkmaz A225 Aqua Teapot Set is designed for reliable performance and durability. If you encounter any issues, please review the following:

- **Handles becoming hot:** While the handles feature insulating material, prolonged exposure to high heat can still warm them. Use caution and consider using oven mitts if necessary, especially after extended boiling.
- **Tea leaves or coffee grounds in beverage:** Ensure the French press plunger is fully depressed and the mesh filter is clean and properly seated. For traditional tea, ensure tea leaves are contained within a suitable infuser or strainer if not using the French press.
- **Stains or discoloration:** Refer to section 5.4 for instructions on removing spots and lime scales. Ensure proper cleaning as outlined in section 5.2.

For issues not covered here, please contact customer support.

7. Specifications

Brand	korkmaz
Model Name	Aqua
Item Model Number	A225
Material	18/10 Cr-Ni Grade Stainless Steel
