Armitron 75/5807GNP

Armitron Women's Genuine Crystal Accented Bracelet Watch

Model: 75/5807GNP

INTRODUCTION

This manual provides essential information for the proper use, care, and maintenance of your Armitron Women's Genuine Crystal Accented Bracelet Watch, Model 75/5807GNP. Please read these instructions carefully to ensure optimal performance and longevity of your timepiece.

PRODUCT FEATURES

- Slightly domed wall-to-wall mineral crystal lens for enhanced durability and clarity.
- Green sunray dial with elegant gold-tone hands and genuine diamond markers for a sophisticated appearance.
- Gold-tone adjustable link bracelet with a secure jewelry clasp and extender for a comfortable fit.
- **Important:** This watch is **not water resistant**. Avoid all contact with water.

Setting the Time

1. Locate the crown on the right side of the watch case.
2. Gently pull the crown outwards to the time-setting position.
3. Rotate the crown clockwise or counter-clockwise to adjust the hour and minute hands to the correct time.
4. Once the time is set, push the crown back into its original position against the watch case to engage the movement and start the watch.

Side view of the watch, highlighting the crown used for time adjustment.

Adjusting the Bracelet

The watch features an adjustable link bracelet with a jewelry clasp and extender. For minor adjustments, the extender can be used. If further sizing is required, such as removing links, it is recommended to consult a professional jeweler or watch repair service to avoid damage to the bracelet.

OPERATING INSTRUCTIONS

This Armitron watch is designed for straightforward timekeeping. Once the time is set as described in the "Setting the

Time" section, the watch will continuously display the current time. No further regular operation is required beyond ensuring the crown is fully pushed in to maintain accuracy.

MAINTENANCE AND CARE

Cleaning

To maintain the appearance of your watch, wipe the case and bracelet regularly with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials, as these can damage the finish.

Battery Replacement

The watch is powered by a quartz movement that requires a battery. When the watch stops or the hands move erratically, it indicates that the battery needs replacement. It is highly recommended to have the battery replaced by a qualified watch technician to prevent damage to the internal components and ensure proper sealing (though this watch is not water resistant, proper reassembly is still important).

Water Resistance

This watch is explicitly stated as NOT water resistant. To prevent damage, avoid exposing the watch to water, moisture, rain, splashes, or submersion. Remove the watch before showering, bathing, swimming, or engaging in any water-related activities.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch has stopped or is losing time.	Battery is depleted.	Replace the battery. It is recommended to have this done by a professional watch technician.
Hands are not moving after setting time.	Crown is not fully pushed in.	Ensure the crown is pushed completely back into the watch case.
Condensation under the crystal.	Exposure to moisture/water.	Immediately take the watch to a professional watch repair service. This watch is NOT water resistant.
