Tenda MF6

Tenda MF6 Mobile WiFi Router User Manual

Model: MF6

INTRODUCTION

The Tenda MF6 is a portable 4G LTE Mobile Wi-Fi Router designed to provide high-speed internet access on the go. It supports Wi-Fi 6 technology, offering 2.4 GHz Wi-Fi speeds up to 286 Mbps. Featuring a 1.44-inch color LCD screen and a 2100 mAh rechargeable battery, the MF6 is compact and easy to use. This manual will guide you through the setup, operation, and maintenance of your device.

PACKAGE CONTENTS

Ensure all items are present in your package:

- 1 x Tenda MF6 Mobile Wi-Fi Router
- 1 x Rechargeable Battery (2100 mAh)
- 1 x USB-C Cable
- 1 x Quick Installation Guide

SETUP

1. SIM Card and Battery Installation

The Tenda MF6 uses a Nano SIM card. Before installation, ensure your Nano SIM card is unlocked and the PIN code is disabled. You can disable the PIN code by inserting the SIM into a mobile phone and adjusting its security settings.

1. Remove the back cover of the device.
2. Insert the Nano SIM card into the designated slot. Ensure it is correctly oriented.
3. Insert the 2100 mAh rechargeable battery into its compartment.
4. Replace the back cover.
5. Press and hold the power button to turn on the device.

Plug & Play

Accede immediatamente a una rete mobile con una scheda Nano SIM sbloccata.

- 1 scorrere la scheda Nano SIM nel dispositivo.
- 2 Installare la batteria originale.
- 3 Premere il pulsante di accensione.
- 4 Connetersi al Wi-Fi mobile

💡 Suggerimenti:

Accedere al sito Web 192.168.0.1 per configurare ulteriormente il dispositivo.

2. Initial Configuration

After powering on, the device will attempt to connect to the 4G network.

- **Connect to Wi-Fi:** On your smartphone, tablet, or computer, search for the Wi-Fi network name (SSID) displayed on the MF6's LCD screen or found on the device label. Enter the Wi-Fi password (Key) also displayed on the screen or

label.

- **Web Management Interface:** Open a web browser and navigate to <http://192.168.0.1> or <http://tendawifi.com>. The default login credentials are usually **admin/admin** (check the device label for exact details). From here, you can configure APN settings, data limits, guest Wi-Fi, and other advanced options.
- **QR Code Connection:** Double-press the power button to display a QR code on the LCD screen. Scan this QR code with your smartphone's camera to quickly connect to the Wi-Fi network.

OPERATING INSTRUCTIONS

LCD Screen Overview

The 1.44-inch color LCD screen provides real-time information about the device status:

- **Signal Strength:** Indicates the strength of the 4G LTE signal.
- **Battery Level:** Shows the remaining battery charge.
- **Data Usage:** Displays current data consumption.
- **Wi-Fi Status:** Indicates if Wi-Fi is active and the number of connected devices.
- **SMS:** Notifies you of new messages received on the SIM card.
- **Wi-Fi Name (SSID) & Password (Key):** Essential for connecting devices.

Wi-Fi Sleep Mode

To conserve battery, the MF6 portable router automatically turns off Wi-Fi if no wireless devices are connected for 10 minutes. To reactivate Wi-Fi, simply press the power button.

MAINTENANCE

Charging the Battery

Charge the MF6 using the provided USB-C cable connected to a standard USB power adapter (5V/1A or 5V/2A recommended, not included) or a power bank.

Für stundenlange Gesellschaft gebaut

Optimiert mit einem 2100-mAh-Akku für längere Konnektivität, die Ihren Anforderungen gerecht wird.

Image: Illustration suggesting up to 8 hours of battery life for the Tenda MF6, with a note that actual battery life may vary based on connected devices and usage scenarios.

Optimal Usage Conditions

- Operating Temperature:** The recommended operating temperature range is 0°C to 35°C (32°F to 95°F).
- Extended Use:** For intensive and prolonged use, it is recommended to keep the device connected to a power source via USB-C without the battery inserted to protect the battery's lifespan.

TROUBLESHOOTING

No Internet Connection

- SIM Card Check:**
 - Ensure the Nano SIM card is correctly inserted.
 - Verify that the SIM card is active and has a valid data plan.
 - Confirm that the SIM card's PIN code is disabled. This can be done by inserting the SIM into a mobile phone and disabling the PIN via its settings. Alternatively, you can attempt to disable it via the MF6's web management page (192.168.0.1).
- APN Settings:** Consult your 4G SIM card operator for the correct APN (Access Point Name) settings. These can be configured in the MF6's web management interface.
- Roaming:** If using the device abroad, ensure that data roaming is enabled on your SIM card plan and configured correctly in the device settings.
- Signal Strength:** Check the signal strength indicator on the LCD screen. If the signal is weak, try moving to a location with better network coverage.

Slow Speed or Unstable Connection

- Environmental Factors:** Signal strength and speed are affected by the router's location, 4G operator coverage, and obstacles between the router and connected devices.
- Wi-Fi Channel:** Access the web management page (192.168.0.1) and set the Wi-Fi channel to "Auto". The router will automatically select the best channel every 15 minutes if no devices are connected. If devices are connected, you can manually select a fixed channel to avoid interference.
- Device Load:** Excessive connected devices or high bandwidth usage can impact performance.

SPECIFICATIONS

Brand	Tenda
Model Name	MF6
Color	Black
Connectivity Technology	4G LTE, Wi-Fi
4G LTE Speed	Up to 150 Mbps Download, 50 Mbps Upload (Cat4)
Wi-Fi Standard	802.11ax (Wi-Fi 6)
Wi-Fi Speed	Up to 286 Mbps (2.4 GHz band only)
Frequency Band Class	Single-band (2.4 GHz)
Screen Size	1.44 Inches (Color LCD)

Battery Capacity	2100 mAh (Rechargeable Lithium)
Charging Interface	USB-C
Compatible SIM Type	Nano SIM
Operating System	Tenda's proprietary firmware
Operating Temperature	0°C ~ 35°C (32°F ~ 95°F)
Recommended Uses	Camping, Cycling, Home, Travel, Business Trips
Dimensions	9.8 x 5.9 x 1.55 cm (approx.)

Godere la velocità fluida di 4G LTE Wi-Fi 6

Permette di godere di uno streaming fluido, download rapidi di file, video chat stabili, ecc.
