SETUP

Connecting the Keyboard

The MageGee Star84 keyboard is a wired device that connects via a USB-A cable. It supports plug-and-play functionality, requiring no additional software installation.

1. Locate an available USB-A port on your computer (PC or Mac).
2. Connect the USB-A cable from the keyboard to the USB-A port on your computer.
3. The keyboard will be automatically recognized by your operating system.

Adjusting Keyboard Height

The keyboard features two-step adjustable tilt legs on the underside to customize your typing angle for ergonomic comfort.

- Gently flip out the small legs for a slight incline.
- For a steeper incline, flip out the larger legs.

OPERATING INSTRUCTIONS

Backlight Control

The MageGee Star84 keyboard features ice blue backlighting with 19 different operation modes. You can cycle through these modes and adjust brightness.

- To change backlight modes: Press **Fn + ** Repeat to cycle through the 19 available modes.
- To adjust backlight brightness: Press **Fn + ↑** (increase brightness) or **Fn + ↓** (decrease brightness).
- To turn off the backlight: Decrease brightness until the backlight is off, or cycle through modes until an off state is reached.

Anti-Ghosting

The keyboard features full 84-key anti-ghosting technology, ensuring that every key press is registered accurately, even when multiple keys are pressed simultaneously. This is particularly beneficial for fast-paced gaming and typing.

Image: The MageGee Star84 keyboard with text overlay indicating "Full Key Anti-ghosting", illustrating its capability to register multiple simultaneous key presses.

Red Mechanical Switches

The keyboard is equipped with Red mechanical switches, known for their linear and fast response. These switches offer a quiet resistance feedback, making them suitable for both work typing and gaming environments where minimal noise is preferred.

MAINTENANCE

Cleaning the Keyboard

Regular cleaning helps maintain the keyboard's performance and appearance.

- Disconnect the keyboard from your computer before cleaning.
- Use a soft, lint-free cloth slightly dampened with water or a mild cleaning solution to wipe the keycaps and keyboard surface.
- For dust and debris between keys, use compressed air.
- Avoid using harsh chemicals, abrasive cleaners, or excessive moisture, as these can damage the keyboard.

Keycap Replacement (Optional)

The keyboard comes with extra red keycaps for customization. To replace keycaps:

- Gently pull the existing keycap upwards to remove it. A keycap puller (not included) can be used for easier removal.
- Align the new keycap with the switch stem and press down firmly until it clicks into place.

TROUBLESHOOTING

If you encounter issues with your MageGee Star84 keyboard, refer to the following common solutions:

Keyboard Not Responding

- Ensure the USB cable is securely connected to both the keyboard and the computer.
- Try connecting the keyboard to a different USB port on your computer.
- Test the keyboard on another computer to determine if the issue is with the keyboard or the computer's USB port.
- Restart your computer.

Backlight Not Working or Dim

- Increase the backlight brightness using **Fn + ↑**.
- Cycle through backlight modes using **Fn + ** to ensure it's not in an 'off' or 'dim' mode.
- Ensure the keyboard is properly connected and receiving power.

Keys Not Registering or Double-Typing

- Check for any physical obstructions or debris under the affected keycap. Clean with compressed air if necessary.
- Ensure the keycap is properly seated on the switch stem.
- If the issue persists, contact customer support.
