MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your absob Handheld Vacuum Cleaner.

1. Emptying the Dust Cup:

- Twist the dust collection cup counter-clockwise to detach it from the main body.
- Carefully empty the collected debris into a trash bin.

2. Cleaning the Filter:

- Remove the HEPA filter from the dust cup.
- Tap the filter gently to dislodge dust and debris. For a more thorough clean, rinse the filter under running water.
- **Important:** Ensure the filter is completely dry before reinserting it into the dust cup and reattaching it to the vacuum. Using a wet filter can damage the motor.

3. Storage:

Store the vacuum cleaner and its accessories in the provided storage bag in a cool, dry place when not in use.
