## SETUP INSTRUCTIONS

---

### Connecting the Power Adapter

1. Ensure the device you intend to power is turned off.
2. Insert the DC output plug of the Marg AC Adapter into the power input jack of your compatible device (e.g., Casio keyboard).
3. Plug the AC input prongs of the adapter into a standard wall outlet (100-240V AC, 50/60Hz).

4. Turn on your device. The device should now receive power.

## OPERATING INSTRUCTIONS

---

Once connected, the Marg AC Adapter operates automatically, providing a stable power supply to your device. No further user interaction is required during operation.

To disconnect power, first turn off your device, then unplug the adapter from the wall outlet, and finally disconnect the DC plug from your device.

## MAINTENANCE AND CARE

---

To ensure the longevity and safe operation of your Marg AC Adapter, please follow these guidelines:

- Keep the adapter clean and free from dust.
- Avoid exposing the adapter to moisture or extreme temperatures.
- Do not place heavy objects on the power cord.
- Regularly inspect the power cord and adapter for any signs of damage. If damage is found, discontinue use immediately.

## TROUBLESHOOTING

---

If your device is not receiving power, consider the following:

- **No Power:** Ensure the adapter is securely plugged into both the wall outlet and your device. Try a different wall outlet to rule out a faulty power source.
- **Device Not Turning On:** Verify that your device is compatible with the adapter's voltage and current specifications. Check your device's power switch.
- **Adapter Overheating:** While the adapter is designed for low-temperature operation, excessive heat can indicate an issue. Ensure adequate ventilation around the adapter. If overheating persists, discontinue use.

If issues persist, contact customer support.
