4. SETUP

4.1 Physical Placement

Place the projector on a stable, flat surface. Ensure there is adequate ventilation around the device. The projector can project a 100-inch screen from approximately 1.7 meters and up to 150 inches from 5.0 meters, allowing for flexible placement.

Image: Custom Projection Size. The projector allows free adjustment of projection size and position, with examples for 50",

100", and 150" displays at varying distances.

4.2 Power Connection

Connect the provided power cord to the projector's power input and then to a suitable power outlet.

4.3 Initial Power On

Press the power button on the projector or the remote control to turn on the device.

4.4 Focus and Keystone Correction

Adjust the focus ring on the projector lens until the image is clear. Use the 4P/4D keystone correction feature to adjust the image shape if the projector is not perfectly perpendicular to the screen. This feature allows for flexible placement and ensures a rectangular image.

6. MAINTENANCE

6.1 Cleaning

Regularly clean the projector lens with a soft, lint-free cloth. For the exterior, use a dry, soft cloth. Do not use liquid cleaners or abrasive materials.

6.2 Light Source Longevity

The TOPTRO X5 uses an imported light source designed for long-lasting reliability. Its original image optimization function automatically adjusts the image based on bulb attenuation to maintain consistent clarity.

Image: Optimized for Brightness. The X5 projector features 460 ANSI Lumens for true 1080P brightness, compared to other projectors with higher stated lumens but non-real 1080P.

7. TROUBLESHOOTING

- **No Image/Signal:** Ensure all cables are securely connected. Select the correct input source on the projector.
- **Blurry Image:** Adjust the focus ring. Check keystone correction settings if the image is distorted.
- **No Audio:** Verify volume levels on both the projector and the connected device. If using Bluetooth, ensure proper pairing and selection of the correct audio output.
- **WiFi Connection Issues:** Ensure the projector is within range of the WiFi router. Re-enter the WiFi password. Try connecting to the 2.4G or 5G band.
