Bluehive Wireless Charge Pad with LED Lamp

Bluehive Wireless Charge Pad with LED Lamp User Manual

Model: Wireless Charge Pad with LED Lamp

1. PRODUCT OVERVIEW

The Bluehive Wireless Charge Pad with LED Lamp is a versatile device designed to provide both illumination and convenient wireless charging for compatible devices. It features 10W fast-charging capabilities, an LED charging indicator, foreign object detection for safety, and an anti-slip design on both the top and bottom surfaces. This device is compatible with all Qi-enabled smartphones and other devices.

2. PACKAGE CONTENTS

- Bluehive Wireless Charge Pad with LED Lamp
- Power Adapter (*Note: A suitable power adapter is required for optimal performance.*)
- User Manual (This document)

3. SETUP INSTRUCTIONS

1. **Unpack the Device:** Carefully remove the wireless charge pad and LED lamp from its packaging.
2. **Positioning:** Place the device on a stable, flat surface, such as a desk or nightstand. Ensure there is adequate space around the device for proper ventilation and to avoid obstruction of the lamp's light.
3. **Connect Power:** Connect the provided power adapter to the power input port on the back of the charging pad. Plug the other end of the adapter into a standard wall outlet.

***Important:** For optimal performance and to ensure the lamp and charging functions operate correctly, use a power supply that meets the device's power requirements. An insufficient power supply may lead to reduced charging speed or lamp flickering.*

4. **Initial Power On:** Once connected, the device is ready for use. The LED indicator may briefly illuminate to confirm power connection.

4. OPERATING INSTRUCTIONS

4.1. Wireless Charging

The Bluehive Wireless Charge Pad supports 10W fast-charging for compatible Qi-enabled devices. It also features foreign object detection to prevent damage from metal objects placed on the charging surface.

1. **Placement:** Place your Qi-enabled smartphone or other device directly onto the charging pad surface. Ensure the device is centered on the pad for efficient charging. The anti-slip top surface helps keep your device securely in place.
2. **Charging Indicator:** An LED indicator light will illuminate to confirm that your device is charging. If the indicator flashes or does not light up, reposition your device or check for foreign objects.
3. **Charging Modes:** The device supports various charging modes, including 10W Fast Charge for Samsung devices, 7.5W Charge Mode for iPhones, and 5W Standard Charge Mode for other compatible devices. Ensure your device supports these modes for optimal charging speed.

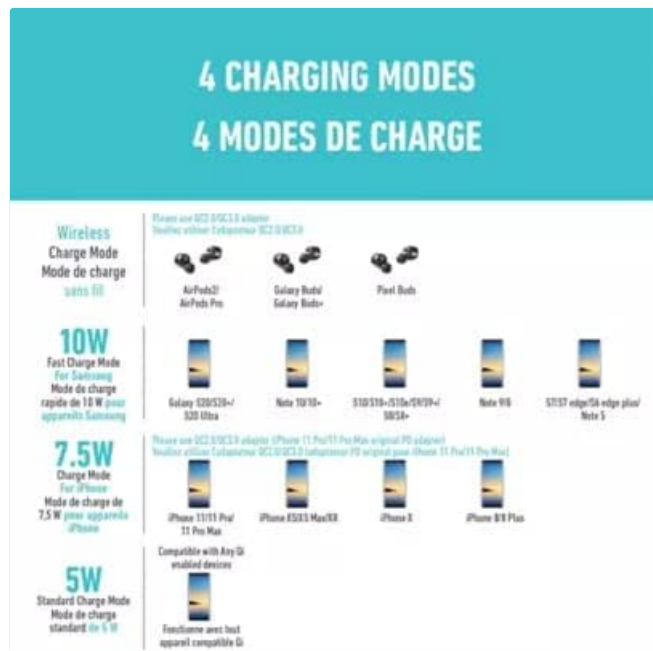

Image 4.2: Visual representation of the different wireless charging modes (10W, 7.5W, 5W) and compatible devices, including a note about adapter requirements for certain modes.

4.2. LED Lamp Operation

The integrated LED lamp provides adjustable illumination. The control panel on the charging base allows for easy adjustment of light settings.

- **Power Button:** Press the power button () to turn the lamp on or off.
- **Brightness Adjustment:** Use the brightness control buttons (+ / -) to increase or decrease the lamp's brightness.
- **Color Temperature Adjustment:** The lamp may offer different color temperature settings (e.g., warm, cool light). Use the dedicated button (often depicted as a sun or color spectrum icon) to cycle through available color temperatures.
- **Timer Function:** If available, a timer button (often depicted as a clock icon) can be used to set the lamp to turn off automatically after a set period.

Image 4.3: Detailed view of the touch-sensitive control panel on the charging base, showing icons for power, brightness, color temperature, and timer functions.

4.3. Wired Charging (USB Port)

In addition to wireless charging, the device includes a 1A USB port for wired charging of other devices.

- **Connect USB Cable:** Plug a standard USB charging cable into the 1A USB port located on the side or back of the charging base.
- **Connect Device:** Connect the other end of the USB cable to your device that requires wired charging.

Image 4.4: An illustration of the product highlighting its key features, including the 10W fast charging capability and the additional 1A USB port for wired charging.

5. MAINTENANCE AND CARE

- **Cleaning:** Disconnect the device from power before cleaning. Use a soft, dry cloth to wipe the surfaces. Do not use abrasive cleaners, solvents, or harsh chemicals, as these may damage the finish.
- **Avoid Liquids:** Keep the device away from water and other liquids. If liquid spills on the device, immediately disconnect power and allow it to dry completely before re-use.
- **Storage:** When not in use for extended periods, store the device in a cool, dry place, away from direct sunlight and extreme temperatures.
- **Handling:** Handle the device with care. Avoid dropping it or subjecting it to strong impacts.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Device not charging wirelessly.	<p>Device not Qi-enabled.</p> <p>Device not properly aligned on the charging pad.</p> <p>Foreign object detected on the charging pad.</p> <p>Insufficient power supply to the charging pad.</p> <p>Device case is too thick or contains metal.</p>	<p>Ensure your device supports Qi wireless charging.</p> <p>Reposition the device to be centered on the charging pad.</p> <p>Remove any metal objects (keys, coins, credit cards) from the charging surface.</p> <p>Ensure the charging pad is connected to a suitable power adapter (e.g., a QC 2.0/3.0 adapter for fast charging).</p> <p>Remove the phone case or use a thinner, non-metallic case.</p>
LED lamp not turning on or flickering.	<p>Not connected to power.</p> <p>Insufficient power supply.</p> <p>Lamp controls not activated.</p>	<p>Verify the power adapter is securely plugged into the device and wall outlet.</p> <p>Ensure you are using a power supply that provides sufficient wattage (e.g., 10W or higher).</p> <p>Press the power button on the control panel to activate the lamp.</p>
Wired USB charging not working.	<p>USB cable is faulty or not connected properly.</p> <p>Device is not compatible with 1A charging.</p>	<p>Try a different USB cable and ensure it is securely connected to both the charging pad and your device.</p> <p>Confirm your device can charge with a 1A output.</p>

7. SPECIFICATIONS

Feature	Detail
Brand	Bluehive
Model	Wireless Charge Pad with LED Lamp
Wireless Charging Output	10W (Fast Charging)
Wired USB Output	1A
Compatible Devices	All Qi-enabled devices (Cellular Phones, etc.)
Lamp Type	LED (Light Emitting Diode)
Control Method	Touch
Features	Wireless Charging, LED Charging Indicator, Foreign Object Detection, Anti-slip Top and Bottom, Portable, 1A USB Port
Maximum Operating Temperature	45.00 °C (113.00 °F)
Minimum Operating Temperature	0.00 °C (32.00 °F)

Feature	Detail
Assembled Height	90.00 mm (3.54 in)
Assembled Length	90.00 mm (3.54 in)
Assembled Weight	0.05 kg (0.11 lb)
Colour	Black
Certifications	CE Certified, Qi Certified

8. WARRANTY AND SUPPORT

Specific warranty information for the Bluehive Wireless Charge Pad with LED Lamp is not provided in this manual. For details regarding warranty coverage, returns, or technical support, please refer to the product packaging or contact Bluehive customer service directly.
