Figure 3.3: Detailed view of the touch-sensitive LED display, showing temperature, time, and preset program icons.

Figure 3.4: Disassembled view of the air fryer, illustrating the removable basket and inner pan for easy cleaning.

- **Main Unit:** Houses the heating element and fan.
- **Control Panel:** Digital LED display with touch controls for temperature, time, and programs.
- **Cooking Basket:** Removable, non-stick basket for holding food.
- **Handle:** Heat-resistant handle for safe removal of the cooking basket.
- **Air Inlet/Outlet:** Located at the top and back for proper air circulation.

4. SETUP AND FIRST USE

1. **Unpacking:** Carefully remove the air fryer and all packaging materials. Keep packaging for future storage if needed.
2. **Cleaning:** Before first use, clean the cooking basket and inner pan with warm soapy water. Wipe the main unit with a damp cloth. Ensure all parts are completely dry before assembly.
3. **Placement:** Place the air fryer on a stable, level, and heat-resistant surface. Ensure there is at least 10 cm (4 inches) of clear space around the back and sides of the appliance for proper ventilation. Do not place it directly against a wall or under cabinets.
4. **Power Connection:** Plug the power cord into a grounded wall outlet (220V).
5. **Initial Run (Burn-in):** For the first use, it is recommended to run the air fryer empty for about 10-15 minutes at 180°C (356°F) to eliminate any manufacturing odors. A slight odor may be present, which is normal and will dissipate. Ensure the area is well-ventilated during this process.

5. OPERATING INSTRUCTIONS

5.1 Basic Operation

1. Pull out the cooking basket from the main unit using the handle.
2. Place your ingredients into the basket. Do not overfill the basket; ensure there is enough space for air circulation.
3. Slide the cooking basket back into the air fryer until it clicks into place.
4. Press the power button on the control panel to turn on the appliance.
5. **Setting Temperature and Time:**
 - Use the temperature control buttons (usually +/- or dedicated temperature icons) to set the desired cooking temperature (80°C to 200°C).
 - Use the timer control buttons (usually +/- or dedicated timer icons) to set the desired cooking time (up to 60 minutes).
6. Press the start button (often the power button again or a dedicated play/pause icon) to begin cooking.
7. During cooking, you can pull out the basket to shake or turn the food. The air fryer will pause automatically and resume when the basket is reinserted.
8. When the cooking time is complete, the air fryer will beep and automatically shut off.
9. Carefully pull out the basket and empty the cooked food onto a plate. Use heat-resistant tongs or utensils.

5.2 Using Preset Programs

The Camry CR 6311 Air Fryer features 9 preset programs for common dishes. These programs automatically set optimal temperature and time, which can then be adjusted manually if needed.

The preset programs include options for:

- Pork
- Chicken
- Shrimp
- Fish
- Pizza
- French Fries
- Cake/Baked Goods
- Vegetables
- Mushrooms/Fruits (for baking)

To use a preset program:

1. Place food in the cooking basket.
2. Turn on the air fryer.
3. Press the program selection button (often an icon resembling a menu or multiple squares) repeatedly until the desired program icon lights up on the display.
4. The display will show the default temperature and time for that program. You can adjust these manually if desired.
5. Press the start button to begin cooking.

6. CLEANING AND MAINTENANCE

Regular cleaning ensures optimal performance and extends the life of your air fryer.

1. **Before Cleaning:** Always unplug the air fryer from the power outlet and allow it to cool down completely before cleaning.

2. Cooking Basket and Inner Pan:

- Remove the cooking basket and inner pan.
- Wash them in warm soapy water using a non-abrasive sponge. For stubborn food residue, soak them in warm water for about 10 minutes.
- Rinse thoroughly and dry completely before reassembling.
- These parts are generally dishwasher safe, but hand washing is recommended to prolong the life of the non-stick coating.

3. Main Unit:

- Wipe the exterior of the air fryer with a damp cloth. Do not use abrasive cleaners or scouring pads.
- Never immerse the main unit in water or any other liquid.

4. Heating Element:

- If necessary, gently clean the heating element inside the appliance with a cleaning brush to remove any food residue. Ensure the appliance is completely cool and unplugged.

5. **Storage:** Store the cleaned and dry air fryer in a cool, dry place.

7. TROUBLESHOOTING

If you encounter issues with your air fryer, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Air fryer does not turn on.	Not plugged in; power outlet malfunction; appliance malfunction.	Ensure the power cord is securely plugged into a working outlet. Check the circuit breaker. If problem persists, contact customer support.
Food is not cooked evenly.	Basket is overloaded; food not shaken/turned; incorrect temperature/time.	Do not overload the basket. Shake or turn food halfway through cooking. Adjust temperature and time as needed.
White smoke coming from the appliance.	Grease residue from previous use; high-fat food cooking.	Clean the basket and inner pan thoroughly after each use. For high-fat foods, add a small amount of water to the bottom of the pan to prevent smoke.
Food is not crispy.	Not enough oil (for certain foods); temperature too low; cooking time too short.	Lightly brush or spray food with oil. Increase temperature or cooking time. Ensure food is dry before cooking.
