

PackIt PKO-ZU-LEM

PackIt Freezable Zuma Can Cooler User Manual

Model: PKO-ZU-LEM

INTRODUCTION

The PackIt Freezable Zuma Can Cooler is designed to keep your food and drinks cold for hours without the need for ice packs. Featuring patented EcoFreeze Technology, the freezable gel is built directly into the walls of the cooler. This collapsible, reusable cooler is ideal for various outdoor activities, picnics, or daily use, fitting up to 15 standard 12 oz cans or a few meals.

SETUP

Preparing your PackIt Freezable Zuma Can Cooler is simple. Follow these steps to activate its cooling capabilities:

1. **Flatten the Cooler:** Ensure the cooler is completely empty and clean. Collapse the cooler flat to maximize contact with the freezer shelves.
2. **Freeze Overnight:** Place the flattened cooler in your freezer overnight (for approximately 12 hours). The built-in EcoFreeze gel will fully freeze, creating a powerful cooling system.

OPERATING INSTRUCTIONS

Once frozen, your Zuma Can Cooler is ready for use. Simply remove it from the freezer and pack your desired items.

- **Packing:** The cooler's gel-lined walls will chill up to 15 12oz cans, a large meal, and snacks for hours, depending on external temperatures. The wide rectangular base is designed to fit Mod Lunch Bento and Mod Snack Bento containers.
- **Closure:** Utilize the zip closure to lock in cool, dry air, maintaining optimal temperature for your contents.
- **Carrying:** The comfortable and adjustable shoulder strap can be worn cross-body for hands-free carrying.

MAINTENANCE

Proper care ensures the longevity and effectiveness of your PackIt Freezable Zuma Can Cooler:

- **Interior Cleaning:** Thoroughly wipe or hand wash the interior lining with mild soap and water.
- **Exterior Cleaning:** Spot clean the exterior fabric as needed.
- **Drying:** Allow the bag to dry completely before refreezing to prevent ice buildup or mildew.
- **Important:** Do not machine wash or place in a dishwasher.

TROUBLESHOOTING

If you encounter any issues with your PackIt Freezable Zuma Can Cooler, consider the following:

- **Cooler Not Staying Cold:** Ensure the cooler was frozen flat for a minimum of 12 hours. The effectiveness can be reduced in extremely hot external temperatures or if the cooler is not fully zipped.
- **Moisture Inside:** The interior is designed to be leak-proof. If moisture is present, ensure all containers inside are sealed properly. Condensation can occur on the exterior in humid conditions, which is normal.
- **Difficulty Folding:** If the cooler is stiff, allow it to warm slightly at room temperature before attempting to fold it flat for freezing.

SPECIFICATIONS

Feature	Detail
Brand	PackIt
Model Name	PKO-ZU-LEM
Color	Lemonade
Material	Polyester
Capacity	8.5 Liters (fits up to 15 12oz cans)
