1. INTRODUCTION

This manual provides essential instructions for the installation, operation, and maintenance of your One For All SV9455-5G Outdoor TV Antenna. This antenna is designed to receive 4K Ultra HD television signals and features an integrated 3G/4G/5G filter to prevent interference from mobile phone signals, ensuring clear reception. Please read this manual thoroughly before use and retain it for future reference.

The One For All SV9455-5G antenna provides clear 4K Ultra HD reception for your home entertainment.

2. PACKAGE CONTENTS

Please check the box for the following items. If any items are missing or damaged, contact your retailer.

- One For All SV9455-5G Outdoor TV Antenna
- Coaxial Cable (10m included)
- Connectors
- Mounting Hardware (Fixing Kit)
- User Manual

The product box clearly displays the antenna, its features, and included accessories like the 10m coaxial cable and fixing kit.

3. SAFETY INFORMATION

- **Installation:** Ensure the antenna is installed securely to prevent it from falling, especially in windy conditions. Avoid installing near power lines or other electrical hazards.
- **Weather Conditions:** While designed for outdoor use, avoid installation or maintenance during thunderstorms.
- **Cables:** Route cables safely to prevent tripping hazards and protect them from damage.
- **Power:** If using an amplified version, ensure the power adapter is connected to a suitable power outlet and kept dry.

4. SETUP

4.1 Antenna Placement

For optimal performance, position the antenna within a 50 km radius of your nearest television transmitter. Higher placement generally improves signal reception. Consider mounting the antenna on a mast, wall, or balcony.

4.2 Installation Steps

1. **Mounting:** Use the provided mounting hardware (fixing kit) to securely attach the antenna to your chosen outdoor location. Ensure the antenna is stable and oriented towards the nearest transmitter.
2. **Cable Connection:** Connect one end of the coaxial cable to the antenna's output port.
3. **Route Cable:** Carefully route the coaxial cable from the antenna to your television, ensuring it is protected from damage and moisture.
4. **Connect to TV:** Connect the other end of the coaxial cable to the antenna input port on your television or set-top box.
5. **Power (if applicable):** If your antenna requires power for amplification, connect the power injector (if included) as per its instructions and plug it into a power outlet.

The antenna is designed for easy installation using standard tools and the included fixing kit.

Ensure proper connection of the antenna to the power injector and then to your television for amplified signal reception.

5. OPERATING

5.1 Tuning Your Television

After connecting the antenna, perform a channel scan on your television or set-top box. Refer to your TV's instruction manual for specific steps on how to initiate a channel scan. This process will detect and store available digital television channels.

5.2 Interference-Free Reception

The SV9455-5G antenna incorporates a unique integrated 3G/4G/5G filter. This filter actively blocks unwanted signals from mobile phones and other wireless devices, ensuring that your television reception remains clear and free from digital artifacts or signal loss caused by mobile interference.

The antenna's built-in filter effectively blocks 3G/4G/5G mobile signals to prevent interference with TV reception.

6. MAINTENANCE

6.1 Durability and Weather Resistance

The One For All SV9455-5G antenna is engineered for outdoor use and designed to withstand various weather conditions, including rain, sun, and wind. Its robust construction ensures long-lasting performance.

6.2 Cleaning

To clean the antenna, gently wipe the exterior with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners, as these may damage the casing. Ensure the antenna is dry before reconnecting any power (if applicable).

The antenna is built to be durable and weather-resistant, ensuring reliable performance in various outdoor conditions.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
No signal or poor picture quality	Incorrect antenna orientation, loose cable connections, weak signal, interference.	Check antenna direction towards transmitter. Ensure all cables are securely connected. Perform a new channel scan on your TV. Try repositioning the antenna.
Missing channels	Incomplete channel scan, antenna not receiving all frequencies.	Perform a full channel scan on your TV. Adjust antenna position and re-scan. Check local transmitter information for available channels.
Intermittent signal loss	Weather conditions, temporary interference, loose connections.	Check cable connections. The antenna's 3G/4G/5G filter should mitigate mobile interference. If issues persist, check for severe weather or local signal disruptions.

8. SPECIFICATIONS

Model Number: SV9455-5G

Brand: One For All

Antenna Type: Outdoor TV Antenna

Compatibility: 4K Ultra HD TV, DVB-T2

Filter: Integrated 3G/4G/5G Filter

Maximum Range: Up to 50 km from transmitter

Impedance: 50 Ohms

Number of Channels: 40 (typical, depends on region)

Color: White (multicolore refers to product image, actual antenna is white)

Item Weight: 1000 Grams

Country of Origin: United States of America

9. WARRANTY & SUPPORT

For warranty information and technical support, please refer to the warranty card included with your product or visit the official One For All website. Keep your proof of purchase for any warranty claims.
