Maintenance

To maintain the appearance and integrity of your JEKCA model, follow these simple guidelines:

- **Cleaning:** Dust the model regularly with a soft, dry cloth or a soft brush. For more thorough cleaning, gently wipe with a slightly damp cloth and then dry immediately. Avoid using harsh chemicals or abrasive cleaners.
- **Storage:** Store the model in a stable location away from direct sunlight, extreme temperatures, and high humidity to prevent material degradation or discoloration.
- **Handling:** While the interlocking system provides stability, avoid dropping or applying excessive force to the model to prevent pieces from detaching.

Troubleshooting

- **Missing Pieces:** In the event of missing pieces, please contact JEKCA customer service directly. Provide details of the missing components and your purchase information for assistance.
- **Difficulty Assembling:** If you encounter difficulty, re-examine the instruction manual for the specific step. Ensure that blocks are oriented correctly and that pins are fully inserted and turned 90 degrees to lock. Sometimes, a small adjustment can resolve the issue.
- **Model Instability:** If the model feels unstable, review the sections you have recently assembled. Ensure all pins are securely locked. The interlocking system is designed for strength, so instability often indicates an incomplete connection.
