## 1. INTRODUCTION

---

Thank you for choosing the WOBSION Travel Compact Mirror. This manual provides essential information for the safe and effective use of your new portable LED makeup mirror. Please read these instructions carefully before use and retain them for future reference.

## 2. PRODUCT FEATURES

---

- **Dual Magnification:** Features a 1x HD mirror and a 10x magnifying mirror for detailed tasks.
- **Integrated LED Lighting:** Equipped with 12 daylight LEDs for optimal illumination.
- **Compact and Portable Design:** With a 3.5-inch diameter and 0.7-inch thickness, it is ideal for travel and fits easily into purses or handbags.
- **Magnetic Switch:** Designed for easy opening and closing without damaging nails.
- **Durable Construction:** Made from high-quality ABS and HD glass materials.

### **3. PACKAGE CONTENTS**

---

Ensure all items are present upon unboxing:

- WOBSION Travel Compact Mirror (Model: compact mirror)
- 2 x CR2032 Batteries (pre-installed or included)
- Instruction Manual (this document)

## Lightweight and Portable

The mirror only weighs **85g**, with human body scientific design-comfortable and smooth lines, more suitable for holding and traveling.

*Image 2: The WOBSION Travel Compact Mirror shown with its included USB-C charging cable. Note: This specific model uses CR2032 batteries, not a rechargeable USB-C port as depicted in some general product images.*

## 4. SETUP

---

### 4.1 Battery Installation

Your WOBSION Travel Compact Mirror requires two CR2032 batteries to power the LED light. These batteries may be pre-installed or included separately.

1. Locate the battery compartment on the back of the mirror.
2. Open the battery compartment cover.
3. Insert two CR2032 batteries, ensuring correct polarity (+ and - sides match the indicators).
4. Close the battery compartment cover securely.

## Lithium Batteries

Image 3: The rear view of the mirror, highlighting the battery compartment for CR2032 batteries and the power switch.

## 5. OPERATING INSTRUCTIONS

### 5.1 Opening the Mirror

The mirror features an upgraded magnetic switch design for easy opening. Gently separate the two halves of the mirror. The magnetic closure will hold it securely when closed.

Image 4: A visual representation of the magnetic switch mechanism that allows for easy opening and closing of the mirror.

### 5.2 Using the Magnification Mirrors

- **1x HD Mirror:** This side provides a true-to-life reflection, suitable for general makeup application and checking your overall appearance.
- **10x Magnifying Mirror:** This side offers enhanced magnification for detailed tasks such as applying eyeliner, mascara, or precise grooming.

**Important Note for 10x Magnification:**

When using the 10x magnifying mirror, maintain a distance of less than 10 cm (approximately 4 inches) from your face. Using it from a greater distance may cause normal dizziness or distorted imaging.

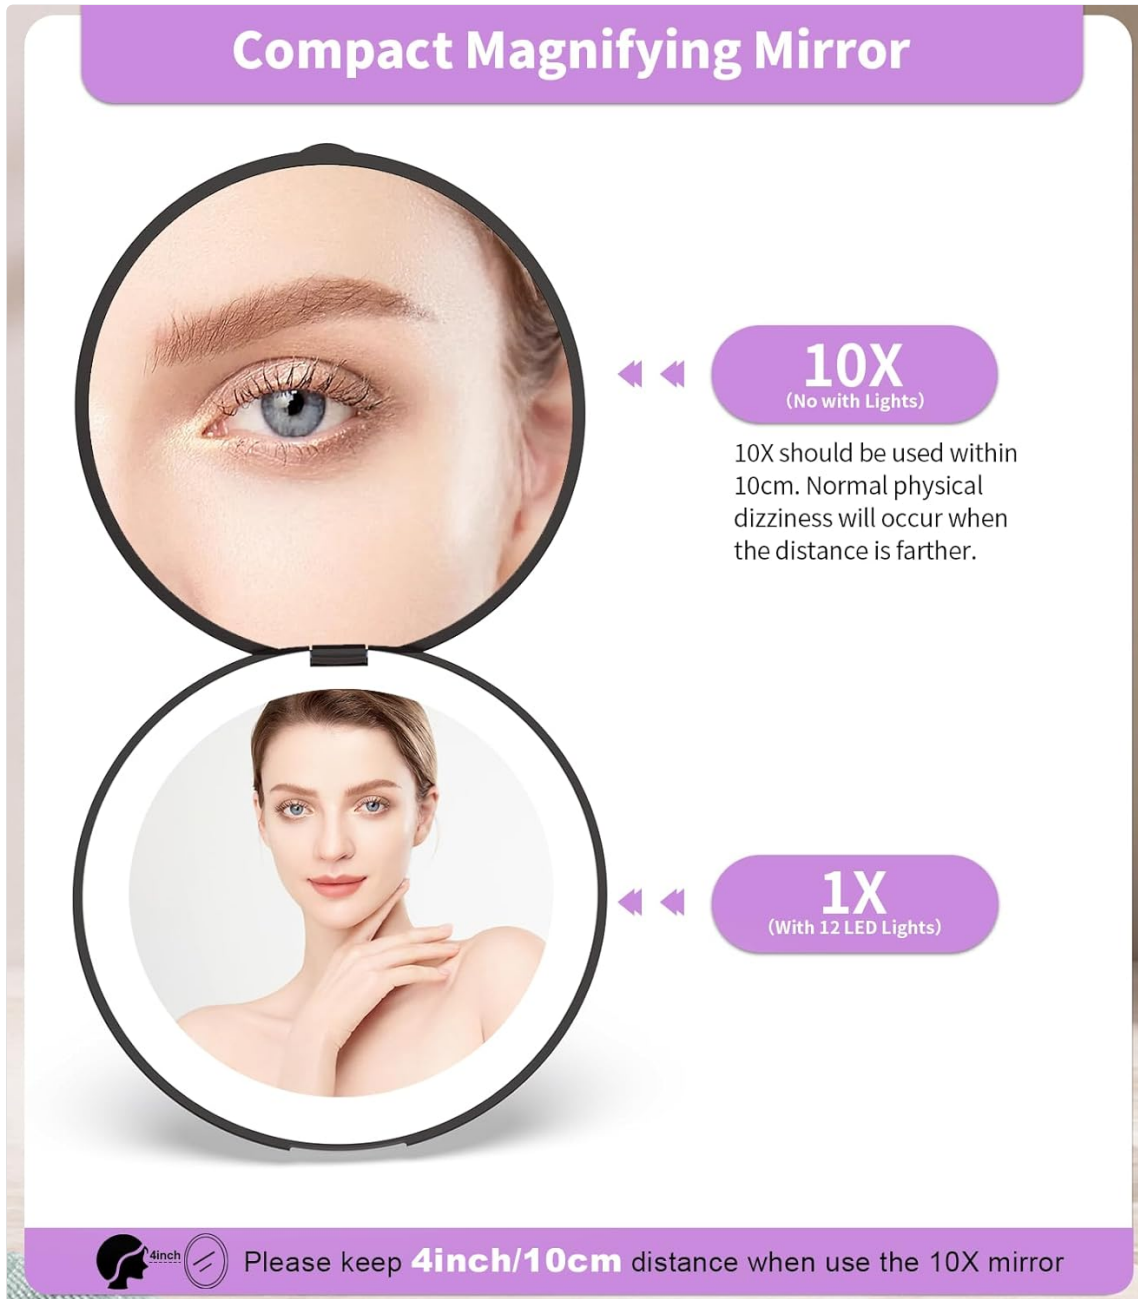

Image 5: The mirror open, displaying both the 1x and 10x magnification sides, with a visual reminder for optimal viewing distance for the 10x mirror.

### 5.3 Activating the LED Light

To turn on the integrated LED light, locate the small switch on the back of the mirror (near the battery compartment). Slide the switch to the "ON" position. To turn off the light, slide the switch to the "OFF" position.

**Reminder:**

The LED light does not automatically turn off when the mirror is closed. Remember to manually switch it off to conserve battery life.

## Lithium Batteries

## 6. MAINTENANCE

### 6.1 Cleaning the Mirror

To clean the mirror surfaces, gently wipe with a soft, lint-free cloth. For stubborn smudges, slightly dampen the cloth with water or a mild, non-abrasive glass cleaner. Avoid using harsh chemicals or abrasive materials that could scratch the mirror or damage the casing.

### 6.2 Battery Replacement

When the LED light dims or stops working, it's time to replace the CR2032 batteries. Follow the steps in Section 4.1 Battery Installation to replace them.

## 7. TROUBLESHOOTING

Problem	Possible Cause	Solution
LED light does not turn on.	Batteries are depleted or incorrectly installed.	Check battery polarity and replace CR2032 batteries if necessary. Ensure the ON/OFF switch is in the "ON" position.
Distorted image on 10x mirror.	Viewing distance is too far.	Ensure your face is within 10 cm (4 inches) of the 10x magnifying mirror.
Mirror is difficult to open.	Magnetic closure is strong.	Apply gentle pressure to separate the halves. The upgraded notch design should assist.

## 8. SPECIFICATIONS

---

- **Model:** compact mirror
- **Brand:** WOBSION
- **Magnification:** 1x (HD) / 10x
- **Light Source:** 12 LED lights (Daylight)
- **Power Source:** 2 x CR2032 batteries
- **Product Dimensions:** 3.9"L x 0.8"W (approximately 9cm diameter, 1.8cm thickness)
- **Frame Material:** Acrylonitrile Butadiene Styrene (ABS)
- **Shape:** Round

## 9. SAFETY INFORMATION

---

- Keep the 10x magnifying mirror less than 10 cm from your face to avoid dizziness or distorted vision.
- Do not expose the mirror to direct sunlight for extended periods, as this may cause fire due to magnification.
- Keep batteries out of reach of children. If swallowed, seek immediate medical attention.
- Dispose of used batteries according to local regulations.
- Avoid dropping the mirror, as it may cause damage to the glass or internal components.
