MAINTENANCE

Regular cleaning ensures optimal performance and hygiene.

- **Daily Cleaning:** After each use, unplug the device and allow it to cool. Empty any remaining water. Wipe the interior and exterior with a soft, damp cloth.
- **Descaling:** Mineral deposits can build up over time. Descale the warmer every 2-4 weeks, or more frequently if you have hard water.
 - a. Mix 50ml of white vinegar with 100ml of cold water.
 - b. Pour the solution into the water reservoir.
 - c. Allow it to soak for 30 minutes to an hour (do not turn on the device).
 - d. Pour out the solution and rinse the reservoir thoroughly with clean water several times.
 - e. Wipe dry with a clean cloth.

- Do not use abrasive cleaning agents, scourers, or solvents.
- Store the device in a dry place when not in use.

TROUBLESHOOTING

If you encounter issues, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Device does not turn on.	Not plugged in; power outage; faulty outlet.	Check power connection; test outlet with another device.
Warming takes too long.	Insufficient water; excessive mineral buildup; incorrect mode selected.	Ensure adequate water level; descale the device; select appropriate mode (e.g., Fast Heating).
Food/milk is too hot/cold.	Incorrect temperature setting; not enough water for steam.	Adjust temperature setting; ensure proper water level.
Sterilization not effective.	Insufficient water; lid not properly closed.	Ensure water reaches the heating element; close lid tightly to trap steam.

If the problem persists after attempting these solutions, please contact customer support.
