OWLENZ 120 inch

OWLENZ 120" Projector Screen User Manual

Model: 120 inch

PRODUCT OVERVIEW

The OWLENZ new upgraded projector screen is designed for a superior viewing experience. It features a lightweight and foldable design, making it highly portable. The screen incorporates a soft black material on the back to prevent light transmission, ensuring a clearer projection picture compared to standard double-sided white projection cloths. This design enhances your home theater experience, perfect for sharing movies and sports matches with family and friends.

PACKAGE CONTENTS

- 1 x 120" Projector Screen
- 16 x Hooks
- 16 x Adhesive Strips

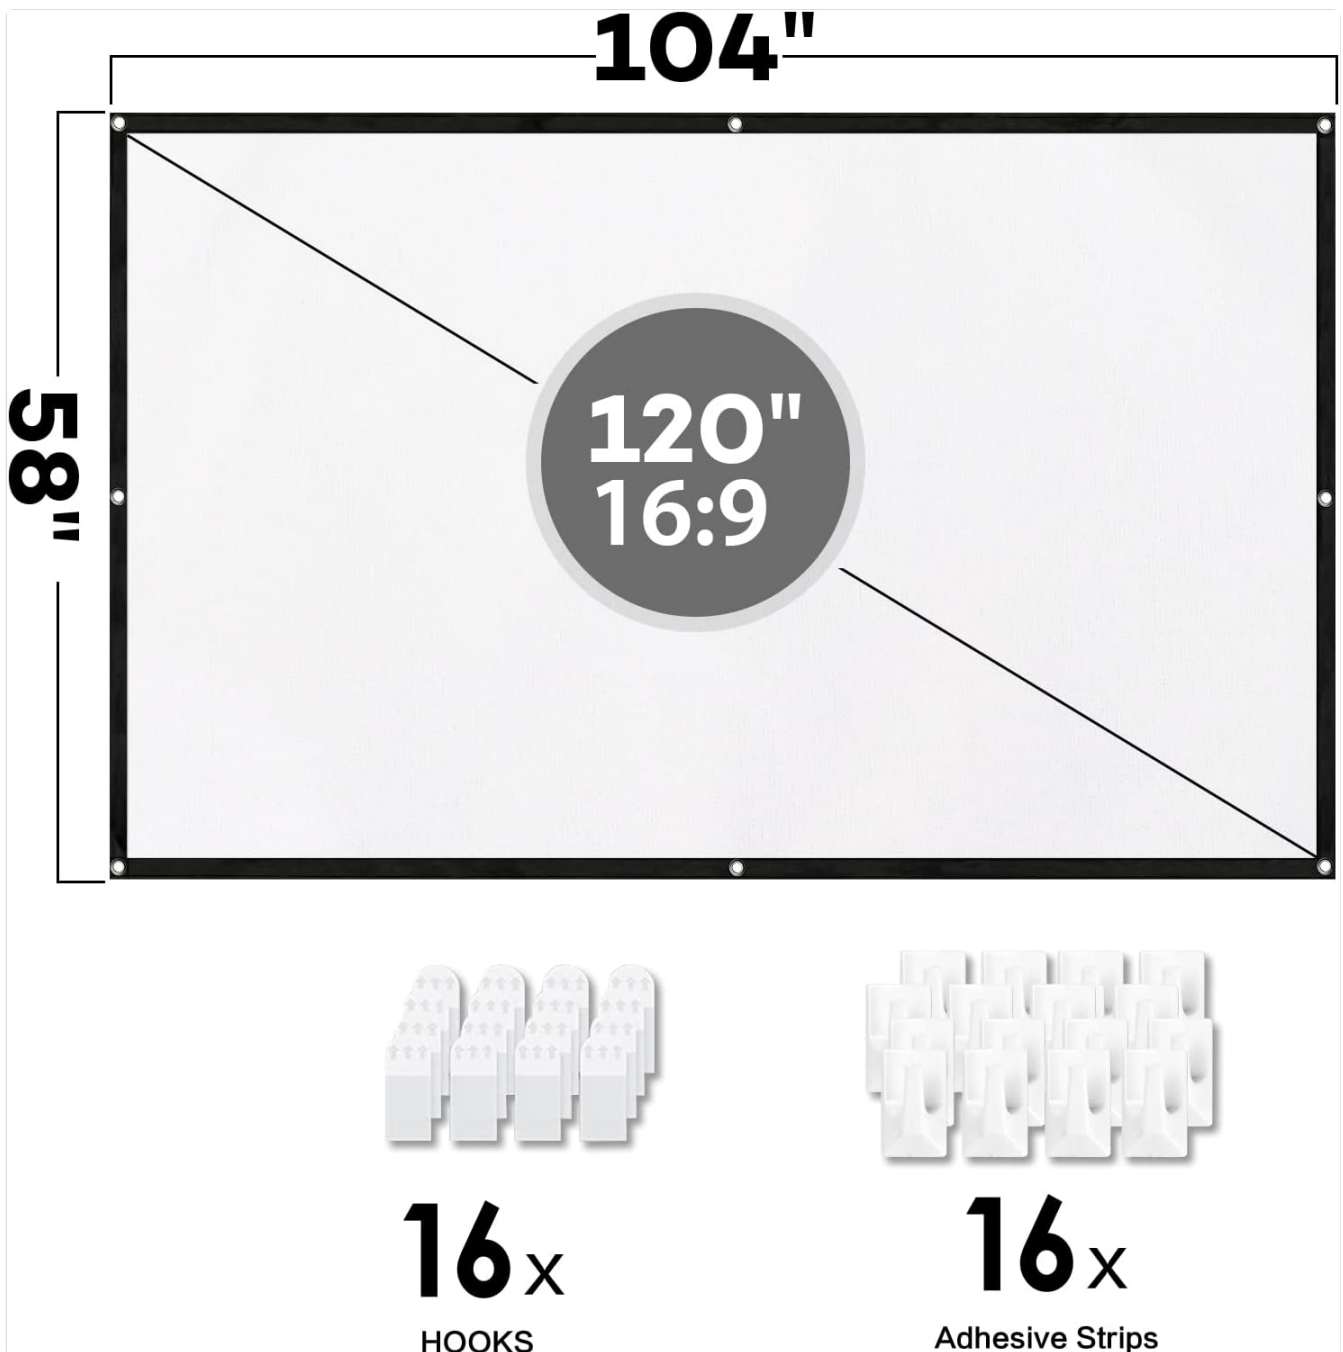

Figure 1: Package contents including the 120-inch screen, 16 hooks, and 16 adhesive strips, along with screen dimensions (104"W x 58"H).

SETUP INSTRUCTIONS

The projector screen is designed for easy installation. Follow these steps to set up your screen:

1. **Unpack the Screen:** Carefully remove the projector screen from its packaging. Note that some wrinkles may be present due to the screen's foldable design and manual sewing. These will lessen with use.
2. **Choose a Flat Surface:** Select a flat wall or suitable surface for installation.
3. **Mark Positions:** Mark the positions for the hooks on your chosen surface. Ensure the marks correspond to the grommets on the screen for proper tension.
4. **Install Hooks:** Use the provided hooks and adhesive strips to secure the screen. The screen can be fastened easily with hooks, ropes, brackets, nails, or double-sided tape on the wall/mount or between trees outdoors.
5. **Hang the Screen:** Begin by hanging the screen using a few hooks. Gently tighten the screen and stick the remaining hooks to the wall, then hang all remaining grommets to flatten the screen.

Install Quickly and Easily

Can use hooks,nails,ropes,double sided tap

OPERATING THE PROJECTOR SCREEN

The OWLENZ projector screen is designed to provide an optimal viewing experience for various activities. Its 16:9 format and 120-inch diagonal size offer a 104 x 58 inch viewing area, supporting 1080P and 4K HD projection. The screen supports front projection only.

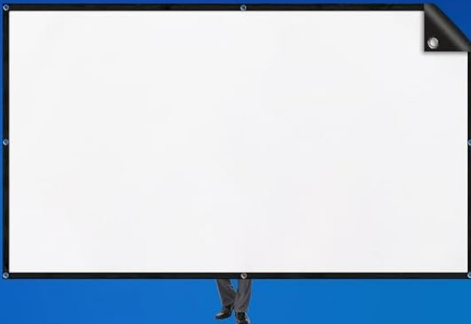

- **Optimal Viewing Angle:** The screen supports a 160-degree viewing angle, allowing for clear images from a wide range of positions.
- **Enhanced Picture Quality:** The black backing material prevents light transmission, significantly improving picture clarity and contrast compared to thinner, transparent screens.
- **Wrinkle-Free Fabric:** Made from 100% natural polyester fabric, the screen is designed to be wrinkle-free after folding or compression, ensuring a smooth projection surface.

MAINTENANCE

To ensure the longevity and optimal performance of your OWLENZ projector screen, follow these maintenance guidelines:

- **Cleaning:** Gently wipe the screen surface with a soft, damp cloth. Avoid using harsh chemicals, abrasive cleaners, or stiff brushes, as these can damage the screen material.
- **Storage:** When not in use, fold the screen carefully and store it in its original packaging or a protective bag to prevent dust accumulation and minimize creasing.
- **Handling:** Always handle the screen by its edges to avoid leaving fingerprints or marks on the viewing surface.

TROUBLESHOOTING

Here are some common issues and their solutions:

- **Wrinkles/Creases:**

Upon first unpacking, some wrinkles may be present. This is normal due to the screen's design and folding. To minimize

wrinkles, install the screen on a flat wall and stretch it tightly using all the provided hooks and adhesive strips. Over time and with proper tension, most wrinkles will become less noticeable.

• **Poor Picture Quality:**

Ensure your projector is properly aligned with the screen and focused. Verify that you are using front projection only, as this screen is not designed for rear projection. Check for any external light sources that might be interfering with the projection, as the black backing is designed to prevent light transmission from behind, not from the front.

• **Hooks Not Sticking:**

Ensure the wall surface is clean, dry, and smooth before applying the adhesive strips. For a more permanent or secure installation, consider using alternative methods like nails or ropes as suggested in the setup instructions.

SPECIFICATIONS

Feature	Detail
Brand	OWLENZ
Model Number	120 inch
