2. IMPORTANT SAFETY INFORMATION

Please read and adhere to all safety warnings to prevent injury and ensure safe operation of the bunk bed.

- **Age Restriction:** High beds and the upper bed of bunk or loft beds are **not suitable for children under 6 years** due to the risk of injury from falls. This product is recommended for ages from 6 years and older.
- **Weight Limit:** The maximum static weight per sleeping level is **100 kg (220 lb)**. This indicates the maximum load the bed can withstand when a person is lying or sitting on it.
- **Mattress Compatibility:** Ensure the mattress used does not exceed the maximum recommended thickness of **11 cm (4 3/8 ")** to maintain proper guardrail height.
- **Assembly:** Proper assembly is crucial for safety. Ensure all components are securely fastened as per the assembly instructions.
- **Regular Checks:** Periodically check all bolts and connections to ensure they remain tight. Retighten as necessary.
- **Fall Hazard:** Do not allow children to play on or under the bed in a manner that could lead to falls or entrapment.

The Tuffing Bunk Bed Frame has undergone and passed strict safety tests, aligning with all safety standards for bunk beds.
