- **Cleaning:** Hand wash with mild soap and warm water. Do not use abrasive cleaners, scouring pads, or harsh chemicals, as these can scratch or damage the plastic.
- **Drying:** Air dry completely or wipe with a soft cloth before refilling or storing.

TROUBLESHOOTING

If you encounter any issues with your storage bins, consider the following:

- **Stability Issues:** Ensure the bin is placed on a flat, level surface. Overloading or uneven weight distribution can affect stability.
- **Scratches:** Minor surface scratches are common with plastic products. Avoid dragging bins across rough surfaces. For deeper scratches, plastic polish may offer some improvement, but results vary.
- **Stains/Odors:** For persistent stains or odors, a mixture of baking soda and water can be used as a paste, left to sit, and then rinsed thoroughly.
