## 11. TROUBLESHOOTING

If you encounter issues with your smartphone, refer to the following common solutions:

| Problem                   | Possible Solution                                                                                                                         |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Phone does not turn on    | Ensure the battery is charged. Connect to a charger for at least 30 minutes. Try pressing and holding the Power button for 10-15 seconds. |
| Cannot connect to Wi-Fi   | Ensure Wi-Fi is enabled. Restart your router. Forget the network and reconnect.                                                           |
| Poor network signal       | Check SIM card insertion. Move to an area with better network coverage. Restart the phone.                                                |
| Apps are slow or crashing | Close background apps. Clear app cache. Restart the phone. Consider a factory reset if issues persist (back up data first).               |
| Battery drains quickly    | Reduce screen brightness. Disable unused features (Bluetooth, GPS, Wi-Fi). Limit background app activity.                                 |
