Western Digital WD Purple 6TB Surveillance Internal Hard Drive

MODEL: WD63PURZ - INSTRUCTION MANUAL

1. Product Overview

The Western Digital WD Purple Surveillance Internal Hard Drive is engineered for 24/7, always-on, high-definition surveillance security systems. These drives are designed to withstand the elevated heat fluctuations and equipment vibrations common in Network Video Recorder (NVR) and Digital Video Recorder (DVR) environments. The WD Purple series incorporates AllFrame technology to help reduce frame loss and improve overall video playback, ensuring reliable performance for continuous recording workloads.

2. Setup and Installation

This section outlines the general steps for installing your WD Purple internal hard drive. Specific installation procedures may vary depending on your surveillance system (DVR/NVR) model. Always refer to your system's documentation for detailed instructions.

1. Preparation:

- Power off and unplug your DVR/NVR system from the power source.
- Open the casing of your DVR/NVR system. Consult your system's manual for proper access.
- Ensure you are working in a static-free environment to prevent damage to electronic components.

2. Mounting the Drive:

- Align the hard drive with the mounting bay inside your DVR/NVR.
- Secure the drive using the appropriate screws provided with your surveillance system. Typically, four screws are used to secure the drive to the bay.

3. Connecting Cables:

- Connect the SATA data cable from the hard drive to an available SATA port on your DVR/NVR's motherboard.
- Connect the SATA power cable from your DVR/NVR's power supply to the hard drive.

4. Closing the System:

- Carefully close the DVR/NVR casing, ensuring all cables are clear of moving parts and the lid is properly secured.
- Reconnect the power source to your DVR/NVR system.

5. Initial System Configuration:

- Power on your DVR/NVR system.
- Access your system's settings or storage management menu.
- The system should detect the new hard drive. You may need to initialize and format the drive before it can be used for recording. For drives 4TB and larger, ensure it is initialized using the GPT (GUID Partition Table) partitioning scheme if your system supports it, for full capacity recognition.
- Follow the on-screen prompts to complete the setup.

3. Operating the Hard Drive

The WD Purple hard drive is designed for continuous operation within a surveillance system. Once installed and configured, it operates automatically as part of your DVR/NVR system.

- **Continuous Recording:** The drive is optimized for 24/7 recording from multiple high-definition cameras.
- **AllFrame Technology:** This technology works with ATA streaming to reduce frame loss, improve playback, and increase the number of supported camera bays.
- **Workload Rate:** WD Purple drives support a workload rate of up to 180 TB/year, suitable for mainstream surveillance applications. The actual workload rate depends on your hardware, software, and configuration.
- **Power Management:** The drive utilizes IntelliSeek technology to calculate optimal seek speeds, which helps lower power consumption, noise, and vibration.

4. Maintenance

Internal hard drives generally require minimal user maintenance. However, adhering to best practices can prolong the life and reliability of your surveillance storage.

- **Environmental Control:** Ensure your DVR/NVR system is placed in a well-ventilated area to prevent overheating. Excessive heat can degrade hard drive performance and lifespan.
- **Power Stability:** Use a reliable power supply and consider a UPS (Uninterruptible Power Supply) to protect against power fluctuations and sudden outages, which can cause data corruption or drive damage.
- **Firmware Updates:** Periodically check the Western Digital support website for any available firmware updates for your specific drive model. Follow instructions carefully if an update is recommended.
- **Data Backup:** While WD Purple drives are reliable, it is always recommended to implement a data backup strategy for critical surveillance footage, if your system allows.

5. Troubleshooting

If you encounter issues with your WD Purple hard drive, consider the following troubleshooting steps:

- **Drive Not Detected:**
 - Verify that both the SATA data and power cables are securely connected to the hard drive and the DVR/NVR motherboard.
 - Ensure the DVR/NVR system's firmware is up to date.
 - Try connecting the drive to a different SATA port or using different cables if available.
- **Recording Issues (Frame Loss, Stuttering):**
 - Check the health status of the hard drive through your DVR/NVR's system diagnostics.
 - Ensure the DVR/NVR system is not overloaded with too many cameras or high-resolution streams beyond its specifications.
 - Verify that the system's cooling is adequate to prevent thermal throttling of the drive.
- **Unusual Noises:**
 - Clicking, grinding, or repetitive beeping sounds can indicate a potential drive failure. Immediately back up any accessible data and consider replacing the drive.
- **System Freezes or Crashes:**
 - While not always drive-related, a failing hard drive can cause system instability. Run diagnostics on the drive.

For persistent issues, consult your DVR/NVR system's support resources or contact Western Digital customer support.

DESCRIPTION DEL PRODUCTO

WD Purple™

DISCO DURE PARA VIDEOSURVEILLANCIA

Características destacadas del producto

- Capacidad máxima de hasta 8 TB
- Carga de trabajo mejorada para cámaras de videovigilancia de uso general
- Tecnología AllFrame™ ofrece un rendimiento superior en la grabación de imágenes de movimiento, con imágenes más claras y nítidas
- Soporta hasta 16 cámaras simultáneas
- Soporta hasta 16 cámaras simultáneas
- Soporta hasta 16 cámaras simultáneas
- Soporta hasta 16 cámaras simultáneas

Tecnología AllFrame exclusiva™ de Western Digital

Toda la línea WD Purple™ está equipada con la tecnología AllFrame™, que mejora el rendimiento de grabación de imágenes de movimiento en 2D y 4K. Esto se logra mediante el uso de algoritmos de procesamiento de imágenes que mejoran la claridad y el detalle de las imágenes de movimiento, incluso en condiciones de poca luz.

Cargas de trabajo mejoradas

La tecnología AllFrame™ mejora el rendimiento de grabación de imágenes de movimiento en 2D y 4K. Esto se logra mediante el uso de algoritmos de procesamiento de imágenes que mejoran la claridad y el detalle de las imágenes de movimiento, incluso en condiciones de poca luz.

Varías cámaras y transmisiones

La tecnología AllFrame™ mejora el rendimiento de grabación de imágenes de movimiento en 2D y 4K. Esto se logra mediante el uso de algoritmos de procesamiento de imágenes que mejoran la claridad y el detalle de las imágenes de movimiento, incluso en condiciones de poca luz.

Diseñado para las soluciones de videovigilancia actuales y futuras

La tecnología AllFrame™ mejora el rendimiento de grabación de imágenes de movimiento en 2D y 4K. Esto se logra mediante el uso de algoritmos de procesamiento de imágenes que mejoran la claridad y el detalle de las imágenes de movimiento, incluso en condiciones de poca luz.

Amplia compatibilidad. Integración impecable.

La tecnología AllFrame™ mejora el rendimiento de grabación de imágenes de movimiento en 2D y 4K. Esto se logra mediante el uso de algoritmos de procesamiento de imágenes que mejoran la claridad y el detalle de las imágenes de movimiento, incluso en condiciones de poca luz.

Gestión del almacenamiento proactiva con WDDA

La tecnología AllFrame™ mejora el rendimiento de grabación de imágenes de movimiento en 2D y 4K. Esto se logra mediante el uso de algoritmos de procesamiento de imágenes que mejoran la claridad y el detalle de las imágenes de movimiento, incluso en condiciones de poca luz.

Tres años de garantía limitada

La tecnología AllFrame™ mejora el rendimiento de grabación de imágenes de movimiento en 2D y 4K. Esto se logra mediante el uso de algoritmos de procesamiento de imágenes que mejoran la claridad y el detalle de las imágenes de movimiento, incluso en condiciones de poca luz.
