GEERTOP TFUS-GNTARP-Green

GEERTOP 17 × 10 ft Large Camping Tent Tarp Instruction Manual

Model: TFUS-GNTARP-Green | Brand: GEERTOP

PRODUCT OVERVIEW

The GEERTOP 17 × 10 ft Large Camping Tent Tarp is a versatile and durable outdoor shelter designed for various activities such as camping, hiking, backpacking, and picnics. It provides protection from sun and rain, serving as a rain fly, hammock cover, or general shelter. This lightweight tarp is constructed from high-quality, waterproof, and UV-resistant material, ensuring reliability in diverse outdoor conditions. Please note that poles are not included with this tarp.

SETUP INSTRUCTIONS

The GEERTOP camping tarp is designed for quick and easy setup, offering multiple configuration options depending on your needs and the environment. While poles are not included, the tarp can be set up using trees, trekking poles, or other available supports.

Basic A-Frame Setup (using poles or trees):

1. **Lay out the Tarp:** Unfold the tarp completely on a flat, clear area, ensuring no sharp objects are underneath.
2. **Position Supports:** Place two poles (not included) or identify two sturdy trees at the desired height and distance apart to form the main ridge of your shelter.
3. **Attach Guylines:** Securely attach the reflective guylines to the reinforced corners and grommets of the tarp.
4. **Raise the Tarp:** Lift the tarp and attach the guylines from the main ridge to your poles or trees.
5. **Stake Down Corners:** Extend the remaining guylines from the tarp's corners outwards and secure them firmly into the ground using the aluminum stakes. Adjust tension as needed to create a taut and stable shelter.
6. **Adjust Tension:** Fine-tune the tension of all guylines to ensure the tarp is stable and sheds water effectively.

Other Configurations:

- **Hammock Rain Fly:** Position the tarp above your hammock, using trees or poles to create a protective canopy.
- **Ground Shelter/Picnic Mat:** Lay the tarp flat on the ground as a waterproof barrier for picnics or as a footprint under a tent.
- **Lean-to Shelter:** Utilize one side of the tarp as a wall and the other as a roof, supported by poles or a natural structure.

Multi-Functional Use - Easy to Set Up

FEATURES AND OPERATION

The GEERTOP camping tarp is engineered with features to enhance your outdoor experience:

- **Waterproof and UV Resistant:** Made from thickened 210T polyester fabric with PU3000mm water resistance and UV50+ protection. This material effectively blocks rain and harmful UV rays, keeping you and your gear dry and protected.

- **Lightweight and Portable:** Weighing approximately 3.3 lbs, the tarp is easy to carry and pack, making it ideal for backpacking and travel. It folds compactly into its included carry bag.
- **Wide Application:** Adaptable for various outdoor scenarios, including campsites, beaches, forests, mountains, and parks. It can be used as a sunshade, rain shelter, hammock tarp, ground mat, or even a car sunshade.

MAINTENANCE AND CARE

- **Cleaning:** After use, especially in wet or muddy conditions, clean the tarp with a soft brush or sponge and mild soap. Rinse thoroughly with clean water. Do not use harsh detergents or bleach, as these can damage the waterproof coating.
- **Drying:** Always ensure the tarp is completely dry before packing it away. Storing a damp tarp can lead to mildew, odors, and degradation of the fabric and waterproof coating. Hang it in a shaded, well-ventilated area until dry.
- **Storage:** Store the clean, dry tarp in its carry bag in a cool, dry place away from direct sunlight and extreme temperatures.
- **Avoid Punctures:** Be mindful of sharp objects, rocks, and branches when setting up and using the tarp to prevent tears and punctures.
- **Flame Retardancy:** This product is slightly flame retardant, but it is not fireproof. Handle with care to avoid fire hazards. Keep away from open flames and high heat sources.

TROUBLESHOOTING

- **Tarp Sagging:** If the tarp sags, check the tension of all guylines and adjust them to be taut. Ensure stakes are firmly

in the ground. Reposition poles or anchor points if necessary to create proper pitch.

- **Water Pooling:** Sagging can lead to water pooling. Ensure the tarp is pitched with sufficient slope to allow water to run off. Adjust guylines and anchor points to eliminate flat spots.
- **Difficulty with Setup:** Ensure you have all necessary components (tarp, guylines, stakes, and optionally poles). Refer to the "Setup Instructions" section and consider practicing setup in a calm environment before your trip.
- **Damage to Fabric:** For small punctures or tears, a fabric repair kit designed for outdoor gear can be used. For larger damage, professional repair may be required.

SPECIFICATIONS

Feature	Detail
Model Number	TFUS-GNTARP-Green
