Vente-unique ADELMO

Vente-unique ADELMO Galvanized Steel Garden Shed

Model: ADELMO | Brand: Vente-unique

INTRODUCTION

This instruction manual provides essential information for the safe and efficient assembly, operation, and maintenance of your Vente-unique ADELMO Galvanized Steel Garden Shed. Please read this manual thoroughly before beginning assembly or use to ensure proper installation and to maximize the lifespan of your product. Keep this manual for future reference.

Safety Warning:

- Anchoring to the ground is required for stability and safety. Failure to properly anchor the shed can result in structural instability, especially in windy conditions.
- Do not exceed the maximum weight limit on the roof. Excessive snow or other heavy loads can cause damage or collapse.
- Always wear appropriate safety gear, such as gloves and eye protection, during assembly.
- Ensure all parts are correctly aligned and securely fastened before use.

SETUP AND ASSEMBLY

Proper site preparation and careful assembly are crucial for the stability and longevity of your garden shed. We recommend two people for assembly.

1. Site Preparation

- Choose a level, firm surface for installation. A concrete slab or a treated timber base is recommended.
- Ensure the area is clear of debris, rocks, and vegetation.
- Verify that there is adequate space around the shed for assembly and future access.

2. Unpacking and Part Identification

- Carefully unpack all components and check against the parts list provided in your separate assembly guide.
- Report any missing or damaged parts to customer service immediately.

3. Assembly Steps

Follow the detailed, step-by-step instructions provided in the separate assembly manual included with your product. General steps typically include:

1. Assemble the base frame.
2. Attach the wall panels, ensuring correct orientation for the wood effect design.

3. Install the roof structure and panels, paying attention to proper sealing for water resistance.
4. Mount the double doors and ensure they operate smoothly.
5. Install the ventilation grilles and any skylight components.

4. Anchoring

Once assembled, securely anchor the shed to its foundation using appropriate anchoring hardware (not always included, check your specific package). This is critical for preventing wind damage and ensuring structural integrity.

The ADELMO garden shed integrated into a garden environment, showcasing its functional design and how it complements an outdoor space.

OPERATING INSTRUCTIONS

Door Operation

The ADELMO garden shed features double doors for easy access. To open, slide the doors along their tracks. Ensure the tracks are kept clear of debris to allow for smooth operation. The integrated handles provide a secure grip.

Ventilation

The shed is equipped with ventilation grilles to promote air circulation and reduce condensation. Ensure these grilles are not blocked by stored items or external obstructions.

Skylight

The integrated skylight allows natural light into the shed, improving visibility without the need for artificial lighting during the day.

MAINTENANCE

Regular maintenance will help preserve the appearance and functionality of your ADELMO garden shed.

- **Cleaning:** Clean the exterior panels periodically with mild soap and water. Avoid abrasive cleaners or harsh chemicals that could damage the galvanized steel or wood effect finish.
- **Inspection:** Annually inspect all fasteners (screws, bolts) to ensure they are tight. Re-tighten if necessary. Check for any signs of rust or damage to the panels and roof.
- **Door Tracks:** Keep the door tracks clean and free of dirt, leaves, or other debris to ensure smooth operation. Lubricate the door runners with a silicone-based spray if they become stiff.
- **Anchoring:** Periodically check the ground anchors for security, especially after severe weather conditions.
- **Roof:** Clear any accumulated leaves, snow, or debris from the roof to prevent excessive load and ensure proper rain drainage.

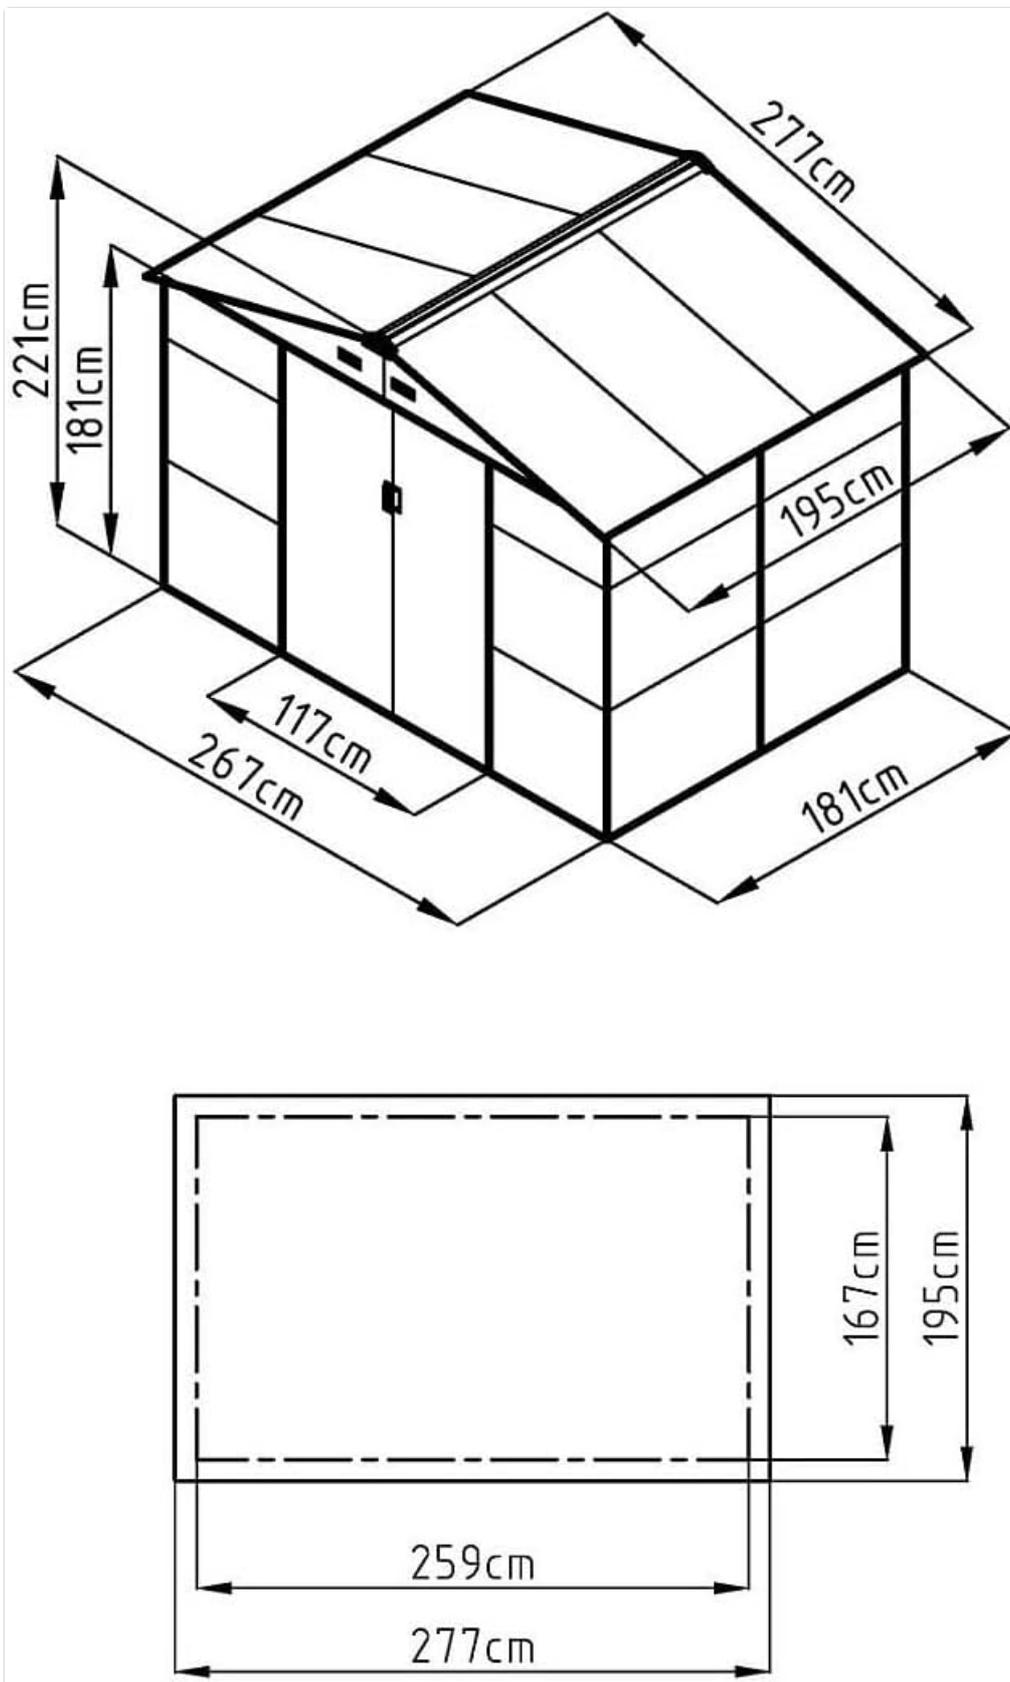

TROUBLESHOOTING

Here are solutions to common issues you might encounter:

Problem	Possible Cause	Solution
Shed feels unstable or wobbly	Improper or insufficient anchoring; uneven ground.	Ensure the shed is securely anchored to a level foundation. Check all frame connections for tightness.
Doors stick or are difficult to open/close	Debris in door tracks; misaligned doors; rusted runners.	Clean door tracks thoroughly. Check door alignment and adjust if necessary. Apply silicone lubricant to runners.
Water leakage inside the shed	Improperly sealed roof or panel joints; damaged panels.	Inspect roof and panel seams for gaps. Apply outdoor-grade sealant if needed. Check for any damage to panels and repair or replace.
Condensation inside the shed	Insufficient ventilation.	Ensure ventilation grilles are clear and unobstructed. Consider adding additional ventilation if the problem persists.

SPECIFICATIONS

Feature	Detail
Model	ADELMO
Brand	Vente-unique
Material	Galvanized Steel (0.25 mm thickness)
Color	Wood Effect Grey / Anthracite Grey
External Dimensions (L x W x H)	277 cm x 195 cm x 221 cm
Internal Dimensions (Approx. L x W)	259 cm x 167 cm (Floor Area)
Total Area	5.40 m ²
Weight	78.5 kg
Door Style	Double Sliding Door
Features	Ventilation Grilles, Skylight, Sloped Roof for Rain Drainage
Water Resistance	Waterproof
