2. INITIAL SETUP

Before your first run, ensure your shoes are properly fitted and laced. The correct fit is crucial for comfort and performance.

Wearing Instructions:

1. **Insert Foot:** Slide your foot into the shoe, ensuring your heel is seated firmly against the back of the shoe.
2. **Lacing:** Adjust the laces to achieve a snug, yet comfortable fit across the top of your foot. Avoid overtightening, which can restrict circulation, or leaving them too loose, which can cause instability.
3. **Check Fit:** There should be about a thumb's width of space between your longest toe and the end of the shoe. Your foot should feel secure without any pinching or excessive movement.

4. CARE AND MAINTENANCE

Proper care will extend the life and maintain the performance of your Under Armour running shoes.

Cleaning Instructions:

- **Spot Cleaning:** Use a soft brush or cloth with mild soap and cold water to gently clean dirt and stains from the mesh upper and sole.
- **Avoid Harsh Chemicals:** Do not use bleach or strong detergents, as these can damage the materials.
- **Drying:** Air dry your shoes at room temperature. Avoid direct sunlight or artificial heat sources (like radiators or dryers), which can cause materials to shrink or warp.
- **Storage:** Store shoes in a cool, dry place away from direct sunlight when not in use.

5. TROUBLESHOOTING COMMON ISSUES

If you encounter any issues with your running shoes, consider the following common solutions:

Fit and Comfort:

- **Discomfort/Rubbing:** Ensure your socks are appropriate for running and that your laces are not too tight or too loose. Break in new shoes gradually.
- **Slipping Heel:** Try different lacing techniques, such as a runner's knot, to secure the heel more effectively.
- **Toe Pain:** Check for adequate toe room (a thumb's width). If your toes are hitting the front, you may need a larger size.

If issues persist, consult with a footwear specialist or contact customer support.

7. SIZING INFORMATION

To ensure the best fit, measure your foot accurately and refer to the size chart below. Under Armour sizing is based on true foot measurement from heel to toe.

How to Measure:

Start with the true foot, which means we measure from heel to toe. That measurement (in centimeters) is then translated into our standard sizes. To find your foot measurement, closely trace your entire foot onto a piece of paper and measure from heel to toe. If your measurement is between chart numbers, we recommend sizing up. Be sure you're putting your full weight on your foot while tracing. Please note: For the best results, measuring later in the day is recommended. Due to metric/imperial conversions, there will be some instances where two US sizes will equal one UK size or one CM size.
