- **Power Input:** Connects to the provided power adapter.
- **Reset Button:** Used to restore factory settings (usually a small pinhole button).
- **System Indicator LED:** Indicates the device's status (e.g., solid white for normal operation, blinking for setup/error).

4. Setup

4.1. Initial Placement

Place the Xiaomi AX3000 unit in a central location in your home, away from obstructions like thick walls, metal objects, and other electronic devices that may cause interference.

4.2. Connecting to Power

1. Connect the power adapter to the power input port on the back of the router.
2. Plug the power adapter into a power outlet. The system indicator LED will light up.

4.3. Connecting to Network

1. Connect one end of the Ethernet cable to the WAN port (blue) of the Xiaomi AX3000 router.
2. Connect the other end of the Ethernet cable to your modem's LAN port or your existing router's LAN port.

4.4. App Installation and Initial Configuration

For the best setup experience, download the Xiaomi Home app on your smartphone or tablet. The app will guide you through the initial setup process, including setting up your Wi-Fi name (SSID) and password.

1. Download the **Xiaomi Home** app from your device's app store (Google Play Store for Android, Apple App Store for iOS).
2. Open the app and create or log in to your Xiaomi account.
3. Follow the on-screen instructions to add your new Xiaomi AX3000 Mesh System. The app will automatically detect the device.
4. Set up your Wi-Fi network name (SSID) and password when prompted.

5. Operating

5.1. Mesh Network Configuration (Adding More Units)

If you have multiple Xiaomi AX3000 units, you can easily expand your mesh network:

1. Place the additional mesh unit in an area where you need extended Wi-Fi coverage, ensuring it's within range of the main router or another mesh unit.
2. Power on the new unit.
3. Open the Xiaomi Home app. The app should detect the new unit and prompt you to add it to your existing mesh network. Follow the on-screen instructions.
4. Alternatively, some units support a mesh button pairing. Press the mesh button on the main router and then on the new unit simultaneously to initiate pairing. Refer to the specific unit's quick start guide for exact button locations.

5.2. Wi-Fi Configuration

The Xiaomi AX3000 supports Dual-Band (2.4 GHz and 5 GHz) Wi-Fi 6 (802.11ax) for optimal performance. You can manage your Wi-Fi settings through the Xiaomi Home app:

- **Network Name (SSID):** Change your Wi-Fi network name.
- **Password:** Update your Wi-Fi password regularly for security.
- **Guest Network:** Create a separate network for guests to enhance security.
- **Band Steering:** The system intelligently directs devices to the optimal Wi-Fi band (2.4 GHz or 5 GHz) for better performance.

5.3. LED Indicator Meanings

- **Solid White:** The mesh system is operating normally and connected to the internet.
- **Blinking White:** The system is starting up, updating firmware, or in pairing mode.
- **Solid Orange/Red:** No internet connection or a system error.
- **Blinking Orange/Red:** Network cable not connected or other connection issues.

6. Maintenance

6.1. Firmware Updates

Regularly check for and install firmware updates via the Xiaomi Home app. Firmware updates provide new features, performance improvements, and security patches. Ensure your device is powered on and connected to the internet during updates.

6.2. Cleaning

To clean the device, use a soft, dry cloth. Do not use liquid cleaners or aerosol sprays directly on the unit. Ensure the device is unplugged before cleaning.

6.3. Resetting the Device

If you encounter persistent issues, you may need to reset the device to its factory settings. This will erase all custom configurations.

1. With the device powered on, use a paperclip or a similar pointed object to press and hold the **Reset** button (usually a small pinhole) for approximately 5-10 seconds.
2. Release the button when the system indicator LED starts blinking rapidly.
3. The device will restart with factory default settings. You will need to reconfigure it using the Xiaomi Home app.

7. Troubleshooting

This section addresses common issues you might encounter.

7.1. No Internet Connection

- Check if the WAN port cable is securely connected to your modem/router.
- Verify that your modem/main router is working correctly and has an active internet connection.
- Restart your modem, then your Xiaomi AX3000 unit.
- Check the system indicator LED for error states (Solid Orange/Red).

7.2. Poor Wi-Fi Signal or Slow Speeds

- Ensure the mesh unit is placed centrally and away from interference sources.

- If using multiple units, ensure they are within optimal range of each other.
- Check for firmware updates.
- Reduce the number of connected devices or consider adding more mesh units for larger areas.

7.3. Cannot Connect to Wi-Fi Network

- Verify that you are entering the correct Wi-Fi password.
- Restart your device (smartphone, laptop) and try connecting again.
- If the issue persists, try resetting the Xiaomi AX3000 to factory settings and reconfiguring it.
