4.2. Tilt Mechanism and Tension Control

The chair features a synchro-tilt mechanism allowing the backrest and seat to recline together.

- **To unlock tilt:** Pull the lever on the left side of the seat upwards. The chair will now allow rocking motion.
- **To lock tilt:** Push the lever on the left side of the seat downwards. The chair will lock in its upright position.
- **Tilt Tension Adjustment:** Rotate the round knob located under the front of the seat. Turn clockwise to increase tension (making it harder to recline) or counter-clockwise to decrease tension (making it easier to recline).

4.3. Flip-up Armrests

The armrests can be flipped up to allow the chair to slide further under a desk, saving space.

- Simply lift the armrests upwards until they lock into the vertical position.
- To return them to the down position, gently pull them downwards.
