MCCAULEY MT11

McCauley Tools MT11 Brush Extender Pro Instruction Manual

Model: MT11 | Brand: MCCAULEY

1. INTRODUCTION

The McCauley Tools MT11 Brush Extender Pro is designed to simplify painting tasks, especially in high or hard-to-reach areas. Its robust construction ensures stability and precision, allowing for clean lines without the need for ladders or scaffolding. This manual provides detailed instructions for safe and effective use of your new tool.

2. SAFETY INFORMATION

WARNING: Always prioritize safety when using tools, especially at height.

- Ensure the extension pole and brush are securely attached before use.
- Do not overextend your reach; maintain a stable stance.
- Inspect the tool and extension pole for any damage before each use.
- Keep hands and fingers clear of moving parts during adjustment.
- Wear appropriate personal protective equipment (PPE), such as safety glasses and gloves.

3. PACKAGE CONTENTS

Your McCauley Tools MT11 Brush Extender Pro package should contain:

- 1 x MT11 Brush Extender Pro unit

Note: Paint brushes, paint rollers, and extension poles are not included and must be purchased separately.

4. SETUP INSTRUCTIONS

4.1 Attaching a Paint Brush

1. Loosen the swivel head brush tightener knob on the extender.
2. Insert the handle of your paint brush into the extender's brush slot. The extender accepts most brush sizes and tool handles from 5/8" to 1 1/4" diameter.
3. Tighten the knob firmly until the brush is securely held. The swivel head conforms to various brush handle shapes without causing damage.

Figure 2: Brush handle size compatibility (5/8" to 1 1/4" diameter).

4.2 Attaching an Extension Pole

1. The MT11 Brush Extender Pro features a patented pole fitting.
2. Screw the extender onto any standard 3/4" threaded extension pole (e.g., broom handles, Purdy & Wooster brand quick connect poles).
3. Ensure the pole is tightly secured to prevent wobbling during use.

Patented multi-pole connection accepts any standard threaded poles, including Purdy® & Wooster® quick-connect poles.

Figure 3: Patented multi-pole connection for various extension poles.

4.3 Adjusting Brush Angle

The extender allows for multiple brush positions, providing various angles for optimal painting. Simply loosen the main adjustment knob, set your desired angle, and re-tighten to secure the position.

Figure 4: Multiple angle adjustments for versatile painting.

5. OPERATING INSTRUCTIONS

Once your brush and pole are securely attached and the angle is set, you can begin painting. The solid construction

with no bendable joints helps maintain straight paint lines, even under working forces.

5.1 Painting High Walls and Ceilings

Use the extended pole to reach high areas without a ladder. The adjustable angle allows you to comfortably paint cornices, ceiling edges, and wall tops.

5.2 Using with Rollers and Other Tools

The extender is versatile and can also be used with paint rollers (roller not included) or other hand tools for cleaning and preparation tasks, provided they fit the 5/8" to 1 1/4" diameter handle slot.

Figure 5: The extender can be used with both brushes and rollers.

6. MAINTENANCE

To ensure the longevity and optimal performance of your MT11 Brush Extender Pro:

- After each use, remove the brush and wipe down the extender with a damp cloth to remove any paint residue.
- Avoid using harsh chemicals or abrasive cleaners, as these may damage the polypropylene construction.
- Store the extender in a clean, dry place away from direct sunlight and extreme temperatures.

7. TROUBLESHOOTING

7.1 Brush Not Holding Securely

- Ensure the brush handle is within the specified diameter range (5/8" to 1 1/4").
- Tighten the swivel head brush tightener knob firmly. The flexible insert should conform to the brush handle for a secure grip.

7.2 Pole Connection Feels Loose

- Verify that the extension pole has a standard 3/4" threaded end.
- Ensure the extender is fully screwed onto the pole.
- If using a quick-connect pole, ensure it is properly engaged with the extender's fitting.
- Note: Some users have reported that plastic pole threads can wear over time with frequent attachment/detachment. Ensure not to overtighten.

8. SPECIFICATIONS

Attribute	Detail
Model Number	MT11
Brand	MCCAULEY
Material	100% Polypropylene (PP)
Compatible Brush Handle Diameter	5/8" to 1 1/4"
Compatible Pole Thread	Standard 3/4" threaded poles, including quick-connect poles
Item Weight	0.01 Ounces
Package Dimensions	7.01 x 3.31 x 1.65 inches
