MAINTENANCE

Cleaning the TV

- Always unplug the TV before cleaning.
- Use a soft, dry, lint-free cloth to gently wipe the screen and frame.
- For stubborn marks, lightly dampen the cloth with water or a screen-cleaning solution specifically designed for electronics. Do not spray liquid directly onto the screen.
- Avoid using abrasive cleaners, waxes, or solvents.

Software Updates

Your Fire TV will periodically receive software security updates to improve performance and add new features. Ensure your TV is connected to the internet to receive these updates automatically. You can check for updates manually in the TV's settings menu.

TROUBLESHOOTING

Problem	Possible Solution
No Power / No Picture	Ensure the power cord is securely plugged into both the TV and a working electrical outlet. Check if the outlet is receiving power by plugging in another device. Try a different power outlet. Press the power button on the TV itself, not just the remote.
No Sound	Check the volume level on the TV and any connected audio devices. Ensure the TV is not muted. Verify audio cables are correctly connected. If using external audio, check the TV's audio output settings (e.g., PCM, Dolby Digital).
Remote Not Responding	Replace the AAA batteries in the remote. Ensure there are no obstructions between the remote and the TV. Try re-pairing the remote with the TV (refer to the Quick Start Guide for specific instructions).
Network Connectivity Issues	Restart your Wi-Fi router and modem. Check the Wi-Fi password entered on the TV. If using Ethernet, ensure the cable is securely connected. Move the TV closer to the router or use a Wi-Fi extender if signal is weak.
Picture Quality Issues (e.g., blooming, inconsistent brightness)	Ensure the content source is high quality (e.g., 4K HDR). Adjust picture settings in the TV menu (brightness, contrast, backlight). Disable or adjust "Adaptive Brightness" or other dynamic picture enhancements if they cause undesirable effects. Ensure the TV's software is up to date.
