Line 6 DL4 MKII Delay Modeler Instruction Manual

Model: DL4 MKII | Brand: Line 6

INTRODUCTION

This manual provides comprehensive instructions for the setup, operation, maintenance, and troubleshooting of your Line 6 DL4 MKII Delay Modeler. The DL4 MKII builds upon the legacy of the original DL4, offering enhanced features and a wider range of delay and looper capabilities.

SETUP

Before operating your DL4 MKII, ensure all connections are made correctly. The pedal is designed for integration into various audio setups, from simple guitar rigs to complex MIDI-controlled systems.

Connecting the DL4 MKII

The rear panel of the DL4 MKII features a variety of input and output options:

- **EXP PEDAL / FS 5/6:** Connect an optional expression pedal for real-time control of parameters or two additional footswitches for expanded functionality.
- **MIC:** An XLR input for connecting a dynamic microphone, allowing for vocal processing and looping.
- **INPUT L/MONO & R:** Standard 1/4-inch inputs for connecting your instrument (e.g., guitar) or other audio sources. Use L/MONO for mono signals.
- **OUTPUT L/MONO & R:** Standard 1/4-inch outputs for connecting to an amplifier, mixer, or other effects units. Use L/MONO for mono output.
- **MIDI IN & OUT/THRU:** 5-pin DIN connectors for MIDI control, allowing the pedal to receive Program Change (PC) and Control Change (CC) messages.
- **DC IN:** Power input for the included 9V DC power supply.

OPERATING THE DL4 MKII

The DL4 MKII retains the intuitive knob and footswitch layout of its predecessor while expanding its sonic capabilities.

Controls Overview

Figure 4: Detailed diagram of the DL4 MKII's control surface, indicating the function of each knob and footswitch.

Figure 5: Top view of the DL4 MKII, providing a visual reference for the physical layout of controls.

- **Delay Type Selector:** A rotary switch to select from 30 different delay types, including 15 new MkII delays from the HX family, 14 original DL4 delays, and the Echo Platter.

- **TIME/SUBDIV:** Controls the delay time and subdivision.
- **REPEATS:** Adjusts the number of delay repeats (feedback).
- **TWEAK & TWEEZ:** These knobs control specific parameters unique to each selected delay model, allowing for fine-tuning of the effect.
- **MIX:** Adjusts the blend of the dry signal with the wet (effected) signal.
- **Footswitches A, B, C:** Used for selecting presets, engaging/bypassing effects, and looper control.
- **TAP Footswitch:** Used for tap tempo, looper functions, and accessing alternate modes.

Delay Models

The DL4 MKII offers an extensive library of delay effects:

- **Classic DL4 Delays:** Analog w/Mod, Analog Echo, Tape Echo, Multi-Head, Sweep Echo, Digital Delay, Digital w/Mod, Reverse, Dynamic, Auto-Volume, Ping Pong, Lo Res Delay, Echo Platter.
- **New MkII Delays (from HX family):** Vintage Digital, Digital Delay Stereo, Pitch Echo, ADT Reverse, Bucked Dynamic, Harmony Auto-Vol, Cross-Digital w/Mod, Euclidean Echo, and more.

Looper Functionality

The DL4 MKII features two looper types:

- **4-Switch Looper:** Offers comprehensive control over recording, playback, overdubbing, and undo/redo.
- **1-Switch Looper:** A simplified looper for quick capture and playback.

Both looper types provide up to 240 seconds of record time, which can be expanded to several hours using an optional microSD card (not included).

MIDI Control

The DL4 MKII supports MIDI In and Out/Thru connections, allowing for advanced control:

- Receive Program Change (PC) messages to recall any of the 128 available presets.
- Receive Control Change (CC) messages to control parameters remotely.
- Footswitch control of up to six presets directly from the unit.

Bypass Options

The pedal offers flexible bypass options to suit your signal chain needs:

- **True Bypass:** Bypasses the pedal completely, maintaining signal integrity.
- **Buffered Bypass:** Provides a buffered signal when bypassed, useful for long cable runs.
- **DSP Bypass:** Allows for trails of the delay effect to decay naturally after bypass.

MAINTENANCE

To ensure the longevity and optimal performance of your Line 6 DL4 MKII, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe down the pedal's exterior. Avoid abrasive cleaners, solvents, or excessive moisture.
- **Storage:** Store the pedal in a cool, dry place away from direct sunlight and extreme temperatures.
- **Connections:** Periodically check all cable connections for wear and tear. Ensure plugs are securely seated in their jacks.
- **Firmware Updates:** Check the official Line 6 website for any available firmware updates, which can improve performance and add new features.

TROUBLESHOOTING

If you encounter issues with your DL4 MKII, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No sound or weak signal	Incorrect cable connections, faulty cables, incorrect input/output levels, power issue.	◦ Verify all cables are securely connected to the correct inputs and outputs. ◦ Test with different cables. ◦ Ensure the pedal is receiving proper power (9V DC, 500mA). ◦ Check the MIX knob setting; ensure it's not set to full dry.
Unwanted noise or hum	Ground loop, faulty power supply, interference from other electronics.	◦ Use a high-quality, isolated power supply. ◦ Try plugging the pedal into a different power outlet. ◦ Ensure proper grounding of all audio equipment. ◦ Move the pedal away from other electronic devices that may cause interference.
Looper record time is short	No microSD card inserted or card is full.	◦ Insert an optional microSD card to expand recording time. ◦ If a card is inserted, ensure it has sufficient free space.
MIDI control not working	Incorrect MIDI settings, faulty MIDI cables, incorrect channel.	◦ Verify MIDI cables are connected correctly (IN to OUT, OUT to IN). ◦ Ensure the DL4 MKII and your MIDI controller are set to the same MIDI channel. ◦ Check the MIDI settings within the DL4 MKII (refer to the full Line 6 manual for advanced MIDI configuration).

For more detailed troubleshooting or issues not listed here, please refer to the official Line 6 support resources or contact customer service.

PLEASE READ CAREFULLY !!!

All the products on offer here were only used for a YouTube Review and have never been gigged or used outside of my studio. You can get them therefore in excellent condition for a good price.

Obviously, if you want more than one, we will combine shipping.

Transactions go through PayPal with Friends and Family, so there should be no fees. If you don't think you can trust me, please don't buy from me. I am not some stranger, you know how to find me!

Pedals shipping to the US, Canada, Mexico etc. ship without tracking and can take up to 8 weeks to arrive. So far every single pedal I shipped has arrived and there were many, but a trackable package is just too expensive.
