## Michael Kors MK8948

# Michael Kors Lexington Men's Watch Instruction Manual

Model: MK8948

## PRODUCT OVERVIEW

---

The Michael Kors Lexington Men's Watch, Model MK8948, is a sophisticated timepiece designed for durability and style. It features a robust stainless steel construction with a multifunction dial, providing both timekeeping and additional tracking capabilities. This manual provides essential information for the setup, operation, and maintenance of your watch.

## Key Features

- **Case & Dial:** Round 45mm stainless steel case with a black dial and a mineral crystal face designed to resist scratches.
- **Watch Band:** Two-tone stainless steel bracelet band with a 22mm width. Links can be adjusted for a customized fit.
- **Movement:** Equipped with a precise quartz movement featuring a three-hand analog display and a multifunction dial for 24-hour time tracking.
- **Water Resistance:** Water resistant up to 50 meters (165 feet), suitable for swimming in shallow water (5 ATM).

## SETUP

---

### Unboxing

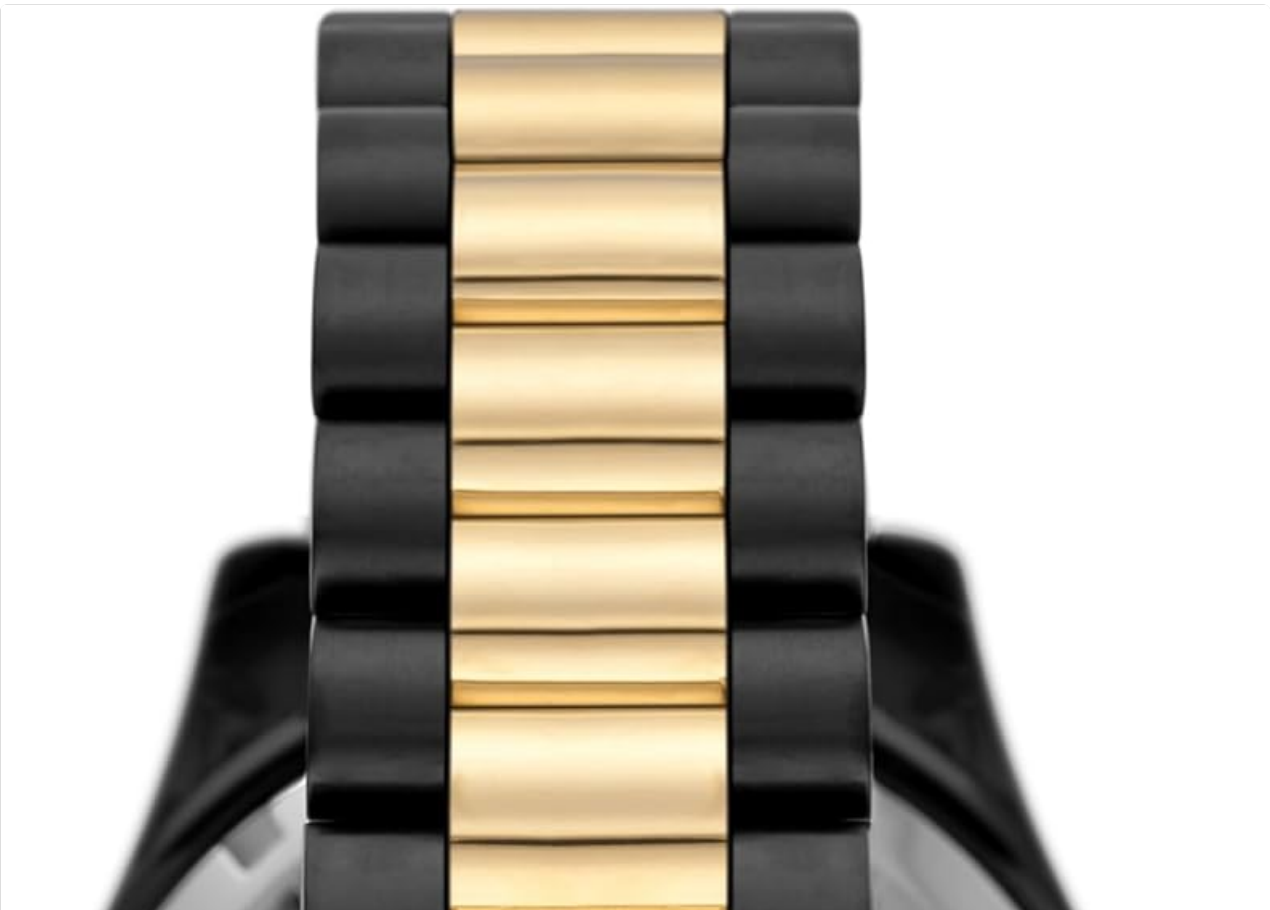

Carefully remove the watch and its accessories from the packaging. Inspect the watch for any visible damage before proceeding with setup.

The Michael Kors watch comes packaged in a white box, ensuring protection during transit.

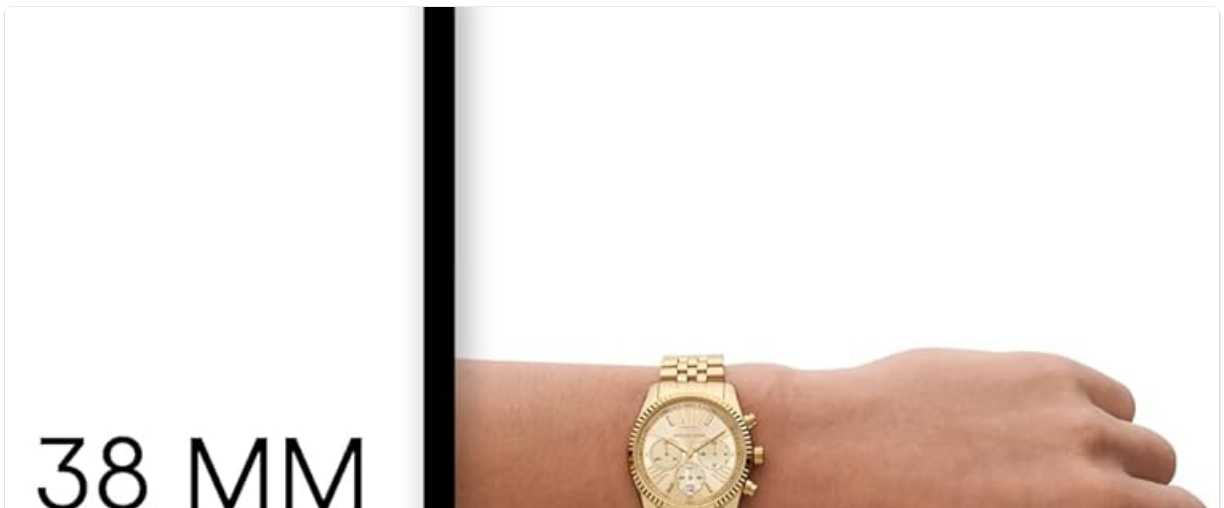

### Adjusting the Band

The stainless steel bracelet band can be adjusted to fit your wrist size. This typically involves removing or adding links. It is recommended to have this procedure performed by a professional jeweler to avoid damaging the watch or band.

## Setting Time and Date

1. **Pull out the crown:** Gently pull the crown (the knob on the side of the watch) to the first or second click position, depending on whether you are setting the date or time.
2. **Set the date (if applicable):** If your watch has a date function, pull the crown to the first click and turn it clockwise or counter-clockwise to adjust the date.
3. **Set the time:** Pull the crown to the second click. Turn the crown to move the hands clockwise until the correct time is displayed. Ensure the 24-hour sub-dial (if present) is also correctly aligned for AM/PM.
4. **Push in the crown:** Once the time and date are set, push the crown back into its original position to start the watch movement and ensure water resistance.

## OPERATING INSTRUCTIONS

---

### Timekeeping

Your Michael Kors Lexington watch utilizes a quartz movement for accurate timekeeping. The main hands display hours, minutes, and seconds. The multifunction sub-dials provide additional information, including a 24-hour indicator.

### Chronograph Function

This watch features a chronograph, allowing you to measure elapsed time. The sub-dials on the watch face are dedicated to this function. Refer to the specific markings on your watch for precise operation of the start, stop, and reset pushers.

### Water Resistance

The watch is water resistant up to 50 meters (5 ATM). This means it is suitable for short periods of recreational swimming in shallow water. It is not suitable for diving, snorkeling, or high-impact water sports. Always ensure the crown is fully pushed in before exposing the watch to water.

## MAINTENANCE AND CARE

---

- **Cleaning:** Wipe the watch regularly with a soft, dry cloth to remove dust and dirt. For the stainless steel band, a slightly damp cloth can be used, followed by immediate drying. Avoid using harsh chemicals or abrasive materials.

- **Storage:** When not in use, store your watch in a cool, dry place, away from direct sunlight and extreme temperatures. The original watch box is ideal for storage.
- **Battery Replacement:** The quartz movement is powered by a battery. When the watch stops or the second hand begins to jump erratically (indicating low battery), it is time for a replacement. Battery replacement should be performed by a qualified watch technician to maintain water resistance and prevent damage.
- **Avoid Impacts:** While durable, avoid dropping the watch or subjecting it to strong impacts, which can damage the internal movement or crystal.

## TROUBLESHOOTING

Problem	Possible Cause / Solution
Watch is not running.	Battery may be depleted. Replace the battery. Ensure the crown is fully pushed in.
Time or date is incorrect.	Refer to the "Setting Time and Date" section to reset. Ensure the crown is fully pushed in after setting.
Condensation under the crystal.	This may indicate a loss of water resistance. Avoid further water exposure and have the watch inspected by a professional.
Chronograph hands do not reset to zero.	Consult a professional watch repair service for adjustment.

## SPECIFICATIONS

Feature	Detail
Model Number	MK8948
Case Diameter	45mm
Case Material	Stainless Steel
Band Material	Stainless Steel
Band Width	22mm
Movement	Quartz
