WantJoin 12L/3.2 Gallon Insulated Beverage Dispenser

USER MANUAL

INTRODUCTION

Thank you for choosing the WantJoin Insulated Beverage Dispenser. This stainless steel unit is designed to maintain the temperature of both hot and cold beverages for extended periods, making it ideal for catering, events, and daily use. Its robust construction and intelligent features ensure convenience and reliability.

Key features include a visual thermometer for accurate temperature monitoring, three-layered insulation for superior temperature retention, and a large 12-liter (3.2-gallon) capacity. The dispenser also features a grooved interior design and a spring-back spigot for easy, spill-free serving.

SETUP

1. **Unpacking:** Carefully remove all packaging materials and inspect the dispenser for any damage. Retain packaging for future storage or transport.
2. **Initial Cleaning:** Before first use, wash the interior and exterior of the dispenser, including the lid and spigot, with warm, soapy water. Rinse thoroughly and dry completely. The unit is dishwasher safe.
3. **Positioning:** Place the dispenser on a stable, flat surface. The unit features foldable tripod legs. To extend the legs for increased clearance for larger cups, simply pull them out until they lock into place. To retract, push them back in.
4. **Lid Operation:** The lid is designed to screw on and off easily for a secure seal. Turn clockwise to tighten and counter-clockwise to loosen.
5. **Thermometer Battery:** The visual electronic thermometer comes with pre-installed batteries. If the display is not working, gently pop off the thermometer unit and replace the small button-cell batteries (replacement batteries are often included).

OPERATING INSTRUCTIONS

- Filling the Dispenser:** Unscrew the lid. Carefully pour your desired hot or cold beverage into the dispenser. The 12-liter capacity allows for a significant volume of liquid.
- Securing the Lid:** Once filled, securely screw the lid back onto the dispenser to ensure optimal temperature retention.
- Monitoring Temperature:** The visual electronic thermometer on the front of the unit will display the internal temperature of the beverage, allowing you to confirm it remains at the desired hot or cold level.
- Dispensing Beverages:** Place a cup directly under the spigot. Pull the spigot handle down to dispense the beverage. Release the handle to stop the flow. Ensure the spigot is fully closed after each use to prevent drips and maintain temperature. The inner groove design helps dispense nearly every last drop.

The dispenser is designed to keep a variety of beverages, such as espresso, hot tea, cold juice, and cold milk, at their ideal serving temperatures for up to 12 hours.

Product Demonstration Video

This video demonstrates the features and operation of the WantJoin Insulated Beverage Dispenser, including filling, lid usage, and dispensing.

MAINTENANCE

- **Cleaning:** After each use, empty any remaining liquid. Wash the interior and exterior with warm, soapy water. Use a soft brush for the spigot to ensure no residue remains. Rinse thoroughly and dry immediately to prevent water spots and maintain the stainless steel's luster. The unit is dishwasher safe.
- **Spigot Care:** Periodically check the spigot for any blockages or leaks. If a leak occurs, ensure the spigot is properly tightened and the internal seals are intact.
- **Lid Seal:** Inspect the lid's internal seal regularly for wear and tear. A damaged seal can compromise insulation performance.
- **Storage:** Store the dispenser in a clean, dry place when not in use.

TROUBLESHOOTING

- **Temperature Display Not Working:** If the digital thermometer display is blank or inaccurate, the batteries may need replacement. Gently remove the thermometer unit and replace the button-cell batteries.
- **Slow Dispensing:** Ensure the spigot is fully open. Check for any blockages in the spigot or the internal grooved design.
- **Leakage from Spigot:** Confirm the spigot is fully closed. If dripping persists, check the spigot's installation and internal washer for proper seating or damage.
- **Beverage Not Staying Hot/Cold:** Ensure the lid is securely screwed on and the internal insulation layers are not damaged.

SPECIFICATIONS

Feature	Detail
Brand	WantJoin
Model Number	WZNCT12LWDBSSUS
Material	Stainless Steel
Color	Silver
Capacity	3.2 Gallons (12 Liters)
Product Dimensions	9.2"L x 9.2"W x 24.4"H
Item Weight	6 Pounds
