

## Technivorm Moccamaster KBGV Select

# Technivorm Moccamaster KBGV Select 10-Cup Coffee Maker Instruction Manual

Model: KBGV Select (53936)

## INTRODUCTION

---

The Technivorm Moccamaster KBGV Select is designed to brew exceptional coffee. This pump-free coffee maker precisely heats water to the optimal temperature range for coffee extraction, ensuring a perfect cup every time. The brew-volume selector switch allows you to choose between brewing a half or full carafe, with adjusted brewing speed and hotplate temperature for consistent quality. The brew basket automatically stops coffee flow when the carafe is removed. All glass carafe brewers feature an independent heating element hotplate to maintain coffee at the ideal temperature.

## SETUP

1. **Unpack Components:** Carefully remove all parts from the packaging. Ensure all components, including the water reservoir, brew basket, carafe, and water distribution arm, are present.
2. **Clean Components:** Wash the glass carafe, brew basket, and lids with warm, soapy water. Rinse thoroughly and dry.
3. **Assemble:** Place the brew basket onto its support. Insert the water distribution arm into its designated slot above the brew basket. Position the glass carafe on the hotplate.
4. **Initial Rinse Cycle:** Before first use, fill the water reservoir with fresh water to the '10-Cup' mark. Place a paper filter (size #4) in the brew basket (without coffee). Run a full brew cycle to rinse the system. Discard the water. Repeat this process once more.

*Video: Detailed guide on setting up your Technivorm Moccamaster coffee maker, including unpacking, cleaning, and initial rinse cycles.*

## OPERATING INSTRUCTIONS

1. **Add Water:** Fill the water reservoir with fresh, cold water to your desired level (up to 10 cups / 40 oz).

*Image: Water being poured into the clear reservoir, showing measurement markings for precise brewing.*

2. **Insert Filter and Coffee:** Place a size #4 paper filter into the brew basket. Add your preferred amount of ground coffee. The industry standard for optimal flavor is 2 tablespoons of ground coffee to every 6 oz of water.

*Image: Close-up of coffee grounds blooming as hot water is dispensed evenly over them during the brewing process.*

- 3. Select Brew Volume:** Use the selector switch on the base of the machine to choose between a half or full carafe brew. This adjusts the brewing speed and hotplate temperature accordingly.

*Image: The power switch and the brew volume selector switch (half or full carafe) located on the front base of the coffee maker.*

4. **Start Brewing:** Press the power switch to begin brewing. The machine will heat water to 196°F - 205°F and brew a full pot in 4-6 minutes.

*Video: A short demonstration showing the rapid brewing process of the Moccamaster coffee maker.*

5. **Keep Warm:** The hotplate will keep your coffee warm at 175°F - 185°F for 100 minutes before automatically shutting off.

## MAINTENANCE

---

- **Regular Cleaning:** Regularly clean the carafe, brew basket, and lids with warm, soapy water.
- **Descaling:** Descale your coffee maker approximately every 3 months, or more frequently depending on water hardness. Use a descaling solution specifically designed for coffee makers, not vinegar, to prevent damage and ensure optimal performance.

## TROUBLESHOOTING

---

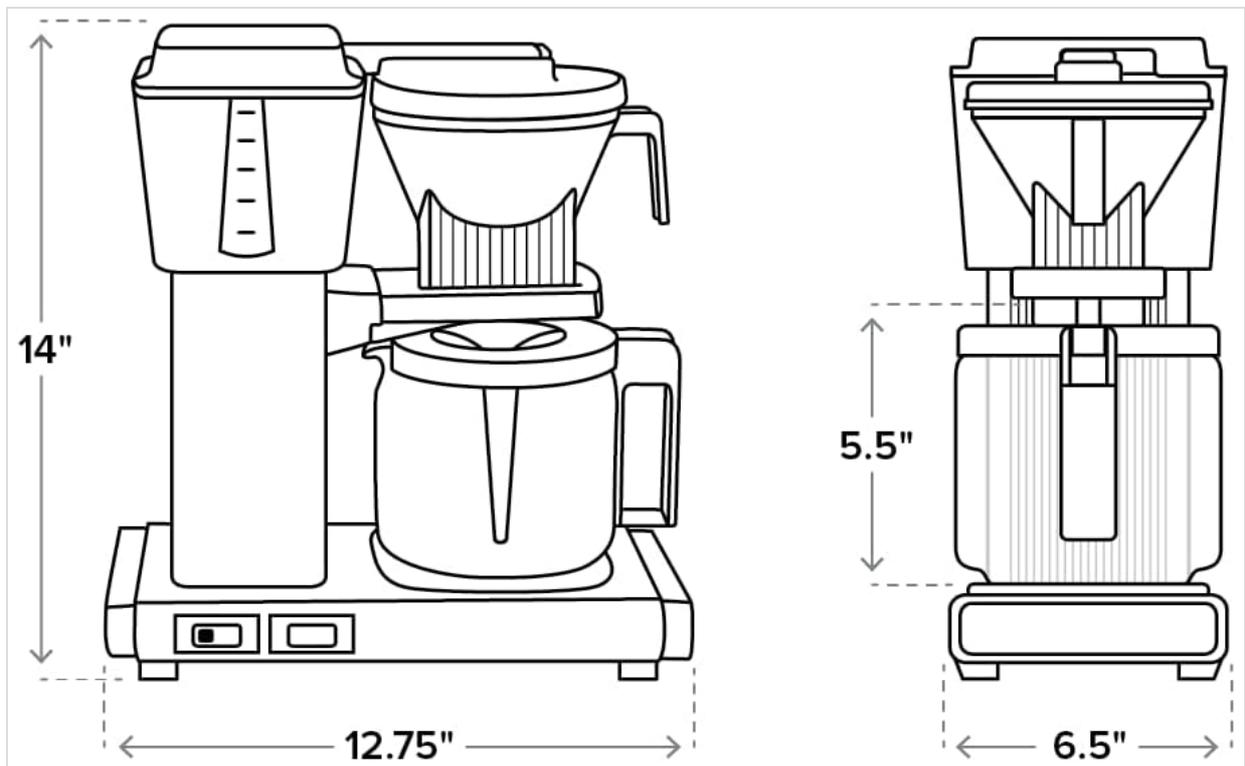

If you encounter any issues, please refer to the comprehensive troubleshooting guide available on the Technivorm Moccamaster official website or contact customer support.

## SPECIFICATIONS

---

<b>Brand</b>	Technivorm Moccamaster
