KAWADA NBDB_007

KAWADA Nanoblock Dragon Ball Z Son Goku NBDB_007 Super Saiyan Building Kit

Instruction Manual

1. Introduction

Welcome to the world of Nanoblock! This instruction manual provides detailed guidance for assembling and maintaining your **KAWADA Nanoblock Dragon Ball Z Son Goku NBDB_007 Super Saiyan** miniature building kit. Nanoblocks are micro-sized building blocks that allow for intricate and detailed creations. This kit enables you to construct a miniature representation of Son Goku in his Super Saiyan form from the popular Dragon Ball Z series.
Please read through this manual carefully before beginning assembly to ensure a smooth and enjoyable building experience.

2. Setup

2.1 Unboxing the Kit

Carefully open the packaging of your Nanoblock kit. Inside, you will find several bags containing the miniature building blocks and a folded instruction sheet. Ensure all components are present before proceeding.

2.2 Preparation for Assembly

- **Choose a suitable workspace:** Select a clean, flat, and well-lit surface to prevent losing any small pieces.
- **Organize your blocks:** While the blocks are typically sorted by color or type in separate bags, you may wish to further organize them into small containers or compartments for easier access during assembly.
- **Review the instructions:** Familiarize yourself with the overall assembly steps outlined in the included instruction sheet.

Warning: This kit contains very small parts and is not suitable for children under 12 years due to choking hazards. Adult supervision is recommended for younger builders.

3. Assembly Instructions

Follow the step-by-step diagrams provided in the official instruction sheet included with your Nanoblock kit. The diagrams illustrate the placement of each block to construct the Son Goku Super Saiyan figure.

3.1 General Tips for Assembly

- **Work methodically:** Assemble the model one step at a time, ensuring each block is securely placed before moving to the next.
- **Use tweezers (optional):** Due to the miniature size of Nanoblocks, a pair of fine-tipped tweezers can be helpful for precise placement of smaller pieces.
- **Pay attention to color and shape:**The instruction diagrams use specific colors and shapes to guide you. Double-check that you are using the correct blocks for each step.
- **Secure connections:** Press blocks firmly together to ensure a stable and durable model.

3.2 Building Sequence

The instruction sheet will guide you through building the base, body, head, and hair sections of the Son Goku figure. Each step typically shows a small section of the model being built or added to the existing structure.

4. Operating (Display and Handling)

Once assembled, your Nanoblock Son Goku Super Saiyan figure is ready for display.

- **Display:** Place your finished model on a stable, flat surface where it will not be easily knocked over. Avoid direct sunlight or extreme temperatures to prevent potential discoloration or warping of the plastic.
- **Handling:** Handle the model gently. While the connections are secure, excessive force can cause pieces to detach.

5. Maintenance

5.1 Cleaning

To keep your Nanoblock model looking its best, dust it regularly with a soft brush or a can of compressed air. For more stubborn dirt, gently wipe with a slightly damp cloth. Avoid harsh chemicals or abrasive cleaners.

5.2 Storage

If you need to store your assembled model, place it in a sturdy container to protect it from dust and damage. If disassembling for storage, keep all blocks together in a sealed bag to prevent loss.

6. Troubleshooting

- **Difficulty connecting blocks:** Ensure blocks are aligned correctly. Sometimes a slight twist or firm, even pressure is needed.
- **Model is unstable or falls apart:** Re-examine the most recently assembled sections. Ensure all blocks are fully pressed together and that you have followed the instructions precisely. Incorrectly placed blocks can affect the structural integrity.
- **Missing pieces:** While kits are checked for completeness, if you believe a piece is missing, carefully check your workspace. If a piece is genuinely missing, contact KAWADA customer support.

7. Specifications

Feature	Detail
Brand	KAWADA
Model Name	NBDB_007 Super Saiyan
Material	Plastic
Approximate Assembled Dimensions	Miniature figure, fits in the palm of a hand (approx. 2-3 inches tall)
Number of Pieces	Numerous miniature building blocks (forms one figure)
Age Recommendation	12+ Years
Educational Objective	Problem Solving Skills, Spatial Reasoning, Motor Skills
Additional Features	Beginner-Friendly, Easy to Build

8. Warranty and Support

For any questions, concerns, or support regarding your KAWADA Nanoblock product, please refer to the contact information provided on the product packaging or visit the official KAWADA website. Specific warranty details, if applicable, will be outlined in the product documentation or on the manufacturer's website.
