## 7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Ink appears faint or dry.	Highlighter left uncapped for too long, or ink level is low.	Recap the highlighter firmly and allow a few minutes for the tip to re-saturate. If still faint, consider refilling the ink.
Ink bleeding through paper.	Paper quality is too thin or absorbent.	While STABILO highlighters are designed to minimize bleed-through on most papers, very thin or highly absorbent paper may still show some ink. Use thicker paper for best results.
Uneven ink flow.	Highlighter stored vertically for extended periods.	Store highlighters horizontally to ensure consistent ink distribution to the tip.
