SETUP

Charging the Device

Before initial use, fully charge your M11 body camera. Connect the provided USB cable to the camera's USB-C port and then to a power source (e.g., computer USB port, wall adapter). The charging indicator will provide feedback on the charging status. A full charge typically takes approximately 4 hours.

Attaching Clips

The M11 comes with both a long clip and a short clip to suit various wearing preferences. To attach a clip, align the clip with the mounting slot on the back of the camera and slide it into place until it clicks securely. Ensure the clip is firmly attached before use.

Secure Your World with Versatile Body Cameras

BOBLOV provides affordable, feature-rich body cameras for law enforcement and civilians. Our mission is to ensure reliable, secure recordings. Focused on innovation, BOBLOV specializes in advancing police body cameras, addressing lost evidence issues, and enhancing public safety.

Powering On/Off

To power on the camera, long press the Power On/Off button located on the side of the device. The screen will illuminate, indicating the camera is active. To power off, long press the Power On/Off button again until the device shuts down.

OPERATING

Recording Video

To start video recording, short press the Video button. The camera will begin recording, and an indicator will typically show recording status. To stop recording, short press the Video button again.

Recording Audio Only

For audio-only recording, locate the Audio button and short press it. The device will begin recording audio, indicated by a specific icon on the screen. Short press the Audio button again to stop recording.

Taking Photos

To capture a still photo, short press the Photo button. The camera will take a picture, which will be saved to the device's internal memory.

Activating Night Vision

The M11's night vision feature can be activated by short pressing the Light button. This will turn on the white illuminator. Long pressing the Light button will turn on the IR lights for enhanced night vision. Short press again to cycle through modes or turn off the lights.

Accessing Recorded Files on Device

To review recorded files directly on the camera, navigate through the menu using the directional buttons and select the playback option. You can then browse through your video, photo, and audio files.

CONNECTING TO COMPUTER

The BOBLOV M11 is compatible with both Windows and Mac operating systems for easy file transfer. Connect the camera to your computer using the provided USB cable. The device will appear as a removable storage drive, allowing you to access and manage your recorded footage without requiring special software.

MAINTENANCE

To ensure the longevity and optimal performance of your BOBLOV M11 body camera, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the camera body. For the lens, use a specialized lens cleaning cloth and solution to avoid scratches.
- **Battery Care:** Avoid fully discharging the battery frequently. Charge the device regularly, even if not in active use, to maintain battery health. Store the camera in a cool, dry place.
- **Storage:** When not in use, store the camera in a protective case to prevent dust and physical damage.

TROUBLESHOOTING

If you encounter issues with your M11 body camera, refer to the following common troubleshooting steps:

- Device Not Powering On:** Ensure the battery is fully charged. If the issue persists, try connecting to a different power source.
- Recording Issues:** Check available storage space. Ensure the device is not in a locked mode.
- File Transfer Problems:** Verify the USB cable connection. Try connecting to a different USB port or computer. Ensure the camera is powered on when connected.
