KUIIYER KU002

KUIIYER 10-Mode High Pressure Handheld Shower Head

Model: KU002

Brand: KUIIYER

Introduction

This manual provides detailed instructions for the installation, operation, and maintenance of your KUIIYER 10-Mode High Pressure Handheld Shower Head, Model KU002. Please read this manual thoroughly before installation and use to ensure proper function and longevity of your product.

Package Contents

Verify that all items listed below are included in your package:

- 1x Handheld Shower Head (5.1 inch)
- 1x Shower Hose (5 ft / 152 cm Steel Long Hose)
- 1x User Manual
- 3x Rubber Washers
- 1x Shower Bracket (Detachable Brass Holder)
- 1x 2.5 GPM Restrictor
- 2x Teflon Tape

This image displays all components included in the package: one handheld shower head, one shower hose (152cm/60inch), one user manual, three rubber washers, one shower bracket, one 2.5 GPM restrictor, and two rolls of Teflon tape.

Features

- **10 Spray Modes:** Offers a variety of spray patterns including Rain, Massage, Misty, Blade Shaped, and combinations for a personalized shower experience.
- **2-Mode Power Wash Spray:** Built-in Point Jet for stubborn grime and Wide Fan for quick rinsing of soap residue.
- **High Pressure Design:** Engineered to deliver strong water flow even in low-pressure environments.
- **Anti-Clog Nozzles:** Features 48 self-cleaning silicone nozzles to prevent mineral buildup and ensure consistent performance.
- **Durable Construction:** Includes a 5 ft steel long hose and a detachable brass holder for reliability.

This diagram highlights the eight distinct spray patterns available from the main shower head face. These include various combinations of rain, blade, massage, and misty sprays, along with a pause function for water conservation.

This image illustrates the two specialized power wash spray modes. The 'Point Jet' delivers a concentrated stream for tackling stubborn grime and buildup, while the 'Wide Fan' provides a broad, powerful spray for quickly rinsing off soap residue from surfaces.

Setup and Installation

Follow these steps for a quick and easy installation:

1. **Prepare the Shower Arm:** Ensure your existing shower arm is clean and free of debris. Apply the provided Teflon tape clockwise around the threads of the shower arm to create a watertight seal.
2. **Install the Shower Bracket:** Screw the shower bracket onto the taped threads of the shower arm. Hand-tighten first, then use a wrench if necessary, being careful not to overtighten.
3. **Connect the Hose:** Attach one end of the shower hose to the outlet on the shower bracket. Ensure a rubber washer is inside the hose connection. Attach the other end of the hose to the handheld shower head, again ensuring a rubber washer is in place. Hand-tighten both connections.
4. **Installation Checkout:** Place the handheld shower head into the bracket. Turn on the water supply and check for any leaks. If leaks occur, tighten the connections slightly or reapply Teflon tape.

video.

Operating Instructions

Selecting Spray Modes

The shower head features a rotating dial on its face to easily switch between 10 distinct spray settings. Rotate the dial clockwise or counter-clockwise to select your desired spray pattern:

- **Blade Shaped Spray:** A focused, strong spray.
- **Rain + Blade Shaped Spray:** Combines the gentle rain with the focused blade spray.
- **Rain Spray:** A classic, full-coverage rain shower experience.
- **Rain + Massage:** Blends the rain spray with pulsating massage jets.
- **Massage:** Concentrated, pulsating jets for muscle relaxation.
- **Massage + Misty:** Combines massage with a fine, gentle mist.
- **Misty:** A soft, fine mist for a delicate rinse.
- **Pause:** Temporarily stops water flow to conserve water without adjusting temperature.

Using the Power Wash Spray

The integrated power wash feature offers two specialized modes for cleaning:

- **Point Jet:** Delivers a highly concentrated, powerful stream to blast away stubborn grime and buildup from tiles and grout.
- **Wide Fan:** Provides a broad, high-pressure fan spray for quickly rinsing off soap residue from larger surfaces like shower walls or tubs.

To activate the power wash modes, locate the switch or button on the side of the shower head and toggle it to select either the Point Jet or Wide Fan setting.

Maintenance

Cleaning the Nozzles

The KUIIYER shower head is equipped with self-cleaning silicone anti-clog nozzles. To remove mineral deposits or buildup, simply rub the silicone nozzles with your finger or a soft cloth. For more stubborn deposits, a solution of equal parts white vinegar and water can be used. Soak the shower head in the solution for 30 minutes, then scrub and rinse thoroughly.

General Cleaning

Clean the exterior of the shower head and hose regularly with a soft cloth and mild soap and water. Avoid using abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the finish.

Troubleshooting

- **Low Water Pressure:** If water pressure is lower than expected, check if the 2.5 GPM flow restrictor is installed. This restrictor can be removed for increased flow, if local regulations permit. Refer to the installation video or consult a plumber for assistance with restrictor removal.
- **Leaks from Connections:** Ensure all connections are hand-tightened and that rubber washers are properly seated. If leaks persist, disassemble the connection, reapply Teflon tape to the threads, and reassemble.
- **Clogged Nozzles:** If water streams are uneven or blocked, rub the silicone nozzles to dislodge mineral buildup. For severe clogs, follow the cleaning instructions in the Maintenance section.

Specifications

Brand	KUIIYER
Model Number	KU002
Product Dimensions	5"L x 5"W (Shower Head Face)
Number of Settings	10
Flow Rate	2.5 Gallons Per Minute (GPM)
Item Weight	1.52 pounds
Hose Length	5 feet (152 cm)
