TROUBLESHOOTING

If you encounter any issues with your dressing table, refer to the following common problems and solutions:

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Table is wobbly or unstable.	Loose fasteners; uneven floor.	Ensure all screws and bolts are securely tightened. Adjust anti-slip pads or use shims if the floor is uneven.
Drawers do not slide smoothly.	Misalignment during assembly; items obstructing movement.	Check that drawers are inserted correctly and nothing is blocking their path. Ensure the table is on a level surface.
Mirror appears too low.	Product design; user height.	The mirror is fixed at a standard height. Consider using a taller stool or chair if needed.
Surface stains easily.	Unprotected wood finish.	Always use coasters for drinks and protective mats for cosmetics to prevent direct contact with the surface. Wipe spills immediately.
