Shernbao Dog Dryer DHD-2400T Instruction Manual

Model: DHD-2400T | Brand: shernbao

IMPORTANT SAFETY INFORMATION

Please read all safety instructions carefully before operating the Shernbao Dog Dryer DHD-2400T. Failure to follow these instructions may result in injury or damage to the product.

- Use at lower speeds near the ears and avoid prolonged use at high speeds to prevent hearing damage to the pet.
- Ensure the dryer is placed on a stable, flat surface during operation.
- Do not block the air inlets or outlets during use.
- Keep the power cord away from heat sources and sharp edges.
- Unplug the dryer from the power outlet when not in use or before cleaning.
- This appliance is intended for pet grooming only. Do not use for other purposes.

PRODUCT OVERVIEW

The Shernbao DHD-2400T is a high-velocity professional dog dryer designed for efficient and effective pet grooming. It features a powerful dual motor system and adjustable speed control to cater to various pet sizes and sensitivities.

Figure 1: Shernbao DHD-2400T High Velocity Dog Dryer, showing the main unit, flexible hose, and three included nozzles.

Key Features:

- **Powerful Dual Motor:** Designed for large dogs and efficient drying, especially in colder conditions.
- **Adjustable Speed Control:** A stepless adjustable speed dial (4921 FPM - 73200 FPM) allows for precise control of airflow, reducing noise levels for sensitive pets.
- **Reduced Drying Time:** Significantly cuts down drying time by over 70% compared to traditional handheld dryers.
- **Included Accessories:** Comes with a 4 ft to 8 ft flexible hose, three different nozzles (circular, diffuse, flattened), and two air filters.

Figure 3: The three interchangeable nozzles included with the dryer: circular, diffuse, and flattened, each designed for specific drying needs.

SETUP INSTRUCTIONS

1. **Unpack:** Carefully remove all components from the packaging. Verify that all parts listed in the "Included Components" section are present.
2. **Attach Hose:** Connect the flexible hose to the air outlet on the front of the dryer unit. Ensure it is securely fastened.
3. **Select Nozzle:** Choose the appropriate nozzle for your grooming task (circular, diffuse, or flattened) and attach it to the end of the flexible hose. The nozzles feature a "twist and lock" mechanism for secure attachment.
4. **Position Dryer:** Place the dryer on a stable, flat surface in a well-ventilated area, away from water sources.
5. **Connect Power:** Plug the power cord into a standard 110V electrical outlet.

OPERATING INSTRUCTIONS

1. **Power On:** Locate the ON/OFF switch on the top of the dryer unit and switch it to the "ON" position.
2. **Adjust Airflow:** Use the "Wind Volume Switch" dial to adjust the airflow speed. Turn the dial clockwise to increase speed and counter-clockwise to decrease speed. Start with a lower speed, especially for sensitive areas or pets new to drying.
3. **Drying Technique:**
 - Always keep the nozzle moving to prevent overheating a single area.
 - For thick coats, use the high velocity to "blow out" excess water and loose undercoat.
 - For sensitive areas like the face and ears, reduce the speed and use caution.
 - The dryer uses heat generated by the motor; there is no separate heating element. The air temperature rise is approximately 62°C / 143°F.
4. **Power Off:** Once grooming is complete, switch the ON/OFF switch to the "OFF" position and unplug the dryer from the outlet.

Figure 4: The control panel of the DHD-2400T, highlighting the ON/OFF switch and the infinitely variable wind volume switch for precise speed adjustment.

Strong wind, Fast Drying

Tips: After many experiments and customer feedback, According to different dog breeds, the amount of hair, and the different environments, the drying time will differ.

MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your Shernbao Dog Dryer.

- 1. Cleaning Air Filters:** The dryer includes two air filters. Regularly check and clean these filters to prevent dust and hair buildup, which can reduce airflow and motor efficiency.
 - Unplug the dryer before cleaning.
 - Remove the filter covers (usually located at the rear of the unit).
 - Remove the filters and gently tap them to dislodge loose debris. For thorough cleaning, you can rinse them with water and allow them to air dry completely before reinserting.

2. **Wipe Down Exterior:** Use a soft, damp cloth to wipe the exterior of the dryer unit and hose. Do not use harsh chemicals or abrasive cleaners.

3. **Hose and Nozzle Inspection:** Periodically inspect the flexible hose and nozzles for any signs of wear, cracks, or damage. Replace if necessary.

4. **Storage:** Store the dryer in a clean, dry place when not in use.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Dryer does not turn on.	Not plugged in; power switch off; no power at outlet.	Ensure power cord is securely plugged in. Check ON/OFF switch. Test outlet with another device.
Weak airflow.	Clogged air filters; hose or nozzle obstruction; speed dial set too low.	Clean air filters. Check hose and nozzles for blockages. Increase speed using the dial.
Unusual noise or vibration.	Foreign object in motor/fan; loose components.	Immediately turn off and unplug the dryer. Inspect for foreign objects. If problem persists, contact customer service.
Hose detaches during use.	Hose not securely attached; nozzle not locked.	Ensure hose is firmly connected to the unit. Twist and lock nozzles securely onto the hose.

SPECIFICATIONS

Attribute	Detail
Model Name	DHD-2400T
Brand	shernbao
Power Source	Corded Electric
Voltage	110V
Wattage	4476 watts (600W-2400W Dual Motor)
Max Air Speed	4921 FPM - 73200 FPM (590 MPM - 73200 FPM)
Max Airflow	7.6 CBM / 270 CFM

Attribute	Detail
Temperature Rise	62°C / 143°F (heat from motor)
Blow Force	960g
Noise Level	50-78dB
Item Weight	16.76 pounds (6.5kg / 14.3 lb)
