3. Setup

Follow these steps to properly set up your Bearhug Electric Blanket:

1. **Unpack:** Carefully remove the blanket from its packaging. Due to vacuum packing, the blanket might appear thin. Gently shake it to restore fluffiness; this may take 24-48 hours.
2. **Position the Blanket:** Lay the electric blanket flat on your bed, ensuring it is evenly spread and not folded or bunched.
3. **Connect Coupler:** Locate the coupler on the blanket. Align the arrows on the connector and the module, then firmly plug in the coupler until it securely locks. Ensure the coupler and controller are dry before connecting.
4. **Connect Power:** Plug the power cord from the controller into a standard 120V/60Hz electrical outlet.

4. Operating Instructions

Your Bearhug Electric Blanket features dual controllers, allowing two users to customize their heat settings independently.

1. **Turn On/Off:** Press the power button on the controller to turn the blanket on or off.
2. **Adjust Heat Levels:** Use the '+' and '-' buttons under 'TEMP' to select your desired heat level from 1 to 10. The temperature ranges from 90°F to 108°F.
3. **Set Auto-Off Timer:** Use the '+' and '-' buttons under 'TIMER' to set the auto-off timer from 1 to 12 hours. The blanket will automatically shut off after the selected duration.
4. **Dual Control:** Each side of the Queen size blanket has its own controller, allowing individual temperature and timer settings.

5. Maintenance

Proper care will extend the life of your electric blanket. Always follow these instructions:

Washing Instructions:

- **Disconnect:** Always disconnect the power cord and coupler from the blanket before washing. Ensure the controller and coupler are dry before re-connecting.
- **Machine Wash:** Machine wash on a gentle cycle with cold water (under 104°F).
- **Do Not Submerge:** Do not submerge cords, power supply, or control units in water.
- **Avoid Chemicals:** Do not dry clean or bleach. Cleaning solvents may damage the wiring insulation.

Drying Instructions:

- **Tumble Dry:** Tumble dry on low heat. Ensure the product has enough room to tumble freely.
- **Avoid Commercial Dryers:** Do not use a commercial dryer.
- **Do Not Iron:** Do not iron the blanket.
- **Line Dry:** If line drying, drape the blanket over two parallel clotheslines or a shower rod to ensure even drying.

Storage:

For long-term storage, ensure the blanket is completely dry. Avoid excessive folding or twisting. Do not place heavy objects on the blanket, as this can damage the internal heating wires. Store in a cool, dry place.

6. Troubleshooting

If you encounter any issues with your Bearhug Electric Blanket, please refer to the following common problems and solutions:

- **Blanket Not Heating:**
  - Ensure the power cord is securely plugged into both the blanket's coupler and the wall outlet.
  - Check if the wall outlet is functional by plugging in another appliance.
  - Verify that the controller is turned on and a heat level is selected.
- **Controller Feels Too Hot:**
  - Ensure the controller is not wrapped in the blanket or placed near other heat sources. It should be in an open area to dissipate heat.
- **Error Code on Display:**
  - Refer to the specific error code in the detailed manual provided with your product or contact customer support.
