- **Dusting:** Regularly dust the surfaces with a soft, dry cloth to prevent buildup.
- **Avoid Moisture:** Do not expose the cabinet to excessive moisture or humidity, as this can cause damage to the engineered wood.
- **Weight Distribution:** Distribute weight evenly on shelves to prevent warping or structural stress.

TROUBLESHOOTING

If you encounter any issues during assembly or use, please refer to the following common solutions:

- **Difficulty with Assembly:** Carefully re-read the instruction manual and review all diagrams. Ensure all parts are correctly oriented and that the correct hardware is used for each step. Some users have noted that diagrams for small screws and dowels can be challenging to interpret; pay close attention to these details.
- **Misaligned Holes or Damaged Parts:** If you find that holes are misaligned or parts are damaged upon unboxing, please contact customer support immediately. Do not attempt to force parts together, as this may cause further damage.
- **Wobbly Cabinet:** Ensure all screws and fasteners are tightened securely. Verify that the cabinet is placed on a level surface. If wobbling persists, ensure the anti-tipping device is correctly installed and tightened to the wall.
- **Doors Not Closing Properly:** Adjust the hinges as shown in Figure 6 to ensure proper alignment and smooth closing of the doors.
