4. SETUP INSTRUCTIONS

4.1 Connecting the Drive

1. Locate the integrated USB 3.0 and USB Type-C cable on the underside of the drive.
2. Connect the appropriate connector (USB 3.0 or USB Type-C) to an available port on your laptop or PC.
3. The drive is plug-and-play, meaning it should be automatically detected by your operating system without needing to install additional drivers.

4.2 Power Supply (Optional)

For some ultra-thin laptops (e.g., Microsoft Surface Pro, Lenovo Yoga) or if you experience insufficient power supply, use the additional Micro-5V Power Port:

1. Connect a standard USB Micro-A cable (not always included) to the Micro-5V Power Port on the drive.
2. Plug the other end of the Micro-A cable into a separate USB power source (e.g., a wall adapter, a powered USB hub). This will supplement the power provided by your computer.

If power shortages, please use extra power cord to connect to another power supply

This power supply port can help the laptop provide enough power to ensure the stability of the connection when the DVD drive cannot be recognized due to insufficient power supply. Applicable to Microsoft Surface pro, Lenovo, yoga, etc

5. OPERATING INSTRUCTIONS

5.1 Playing CDs/DVDs

1. Ensure the drive is properly connected to your computer.
2. Press the eject button on the front of the drive to open the disc tray.
3. Place your CD or DVD onto the tray, ensuring it is seated correctly with the label side facing up.
4. Gently push the tray back into the drive until it clicks shut.
5. Your computer should automatically detect the disc. If not, open "This PC" or "My Computer" and double-click the drive icon.
6. Use your preferred media player software (e.g., VLC Media Player, Windows Media Player) to play the content.

MULTIFUNCTION

5.2 Burning CDs/DVDs

1. Insert a blank CD-R/RW or DVD-R/RW into the drive as described above.
2. Your operating system may prompt you to choose an action (e.g., "Burn files to disc"). Select the appropriate option or open your burning software.
3. Follow the instructions provided by your burning software to select files, configure burning settings, and start the burning process.
4. Ensure the drive is stable and not disturbed during the burning process to prevent errors.

5.3 Region Code for DVDs

For DVD playback, the external DVD drive needs to be set to the same region code as the DVD disc. You can usually find the region code on your disc's information. Most DVD player software allows you to change the drive's region code a limited number of times.

6. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the drive. Do not use liquid cleaners or aerosols.
- **Disc Care:** Always handle discs by their edges. Keep discs clean and free of scratches to ensure proper reading and writing.
- **Storage:** When not in use, store the drive in a cool, dry place. The integrated cable management helps keep the cable protected during storage and travel.
- **Avoid Impact:** While the drive is designed to be shockproof, avoid dropping or subjecting it to strong impacts, especially when a disc is inside.

7. TROUBLESHOOTING

- **Drive Not Detected:**
 - Ensure the USB cable is securely connected to both the drive and your computer.
 - Try connecting to a different USB port on your computer.
 - If using an ultra-thin laptop, connect an external power source to the Micro-5V Power Port.
 - Restart your computer.
- **Disc Not Reading/Writing:**
 - Check if the disc is clean and free of scratches or smudges.
 - Ensure the disc is placed correctly on the tray, label side up.
 - Verify that your media player or burning software is up to date.
 - For DVDs, ensure the drive's region code matches the disc's region code.
- **Insufficient Power:**
 - Connect an external power source to the Micro-5V Power Port using a compatible USB Micro-A cable and power adapter.
 - Try connecting the drive to a powered USB hub.

- **Disc Stuck in Drive:**

- Locate the small emergency eject hole on the front of the drive, usually next to the eject button.
- Gently insert a straightened paperclip into the hole until the tray partially ejects. Pull the tray out manually to retrieve the disc.
