| Dimensions (L x W x H) | 6.69 x 3.74 x 3.35 inches |
| Item Weight | 16 ounces (1 pound) |
| UPC | 810009520139 |

SETUP AND INSTALLATION

The Milenco MIL-2042 lock is designed for high-strength security and bolts directly through the recreational vehicle wall. Professional installation is recommended if you are unfamiliar with RV modifications.

1. **Prepare Mounting Area:** Identify a suitable location on your recreational vehicle door. Ensure there is an unobstructed inside space of at least 105mm (Width) x 90mm (Height) for the lock mechanism.
2. **Drill Pilot Holes:** Carefully mark and drill pilot holes for the mounting bolts. Refer to the lock unit for precise hole alignment.
3. **Secure the Lock:** Position the lock unit on the exterior of the door. From the interior, align the backing plate and secure the lock using the provided 4x M6 bolts. Tighten securely, but do not overtighten.
4. **Thicker Walls (Artic Walls):** If your recreational vehicle has thicker walls (e.g., Artic walls), the included M6 bolts may not be long enough. In such cases, you will need to source and use longer screws of appropriate strength and thread for secure installation.
5. **Test Functionality:** After installation, test the lock with the provided keys to ensure smooth operation and secure locking.

OPERATING INSTRUCTIONS

The Milenco MIL-2042 is a simple key-operated lock.

- **To Lock:** Insert one of the provided keys into the keyhole and turn it clockwise until the lock mechanism engages. Remove the key.
- **To Unlock:** Insert the key into the keyhole and turn it counter-clockwise until the lock mechanism disengages. Remove the key and open the door.

Always ensure the key is fully inserted before turning to prevent damage to the lock or key.

MAINTENANCE

Regular maintenance will help prolong the life and functionality of your lock.

- **Cleaning:** Wipe the exterior of the lock with a soft, damp cloth. Avoid abrasive cleaners or solvents that could damage the plastic finish.
- **Lubrication:** Periodically apply a small amount of graphite lubricant or a silicone-based spray lubricant to the keyhole to ensure smooth key insertion and turning. Do not use oil-based lubricants as they can attract dirt.
- **Inspection:** Regularly check the mounting bolts for tightness. If any bolts are loose, gently tighten them. Inspect the lock mechanism for any signs of wear or damage.

TROUBLESHOOTING

If you encounter issues with your Milenco MIL-2042 lock, refer to the following common problems and solutions:

- **Key is difficult to insert or turn:**
 - Ensure the key is clean and free of debris.
 - Apply graphite or silicone lubricant to the keyhole.
 - Check if the key is bent or damaged. Use the spare key if available.
- **Lock mechanism feels stiff:**
 - Lubricate the internal mechanism by spraying lubricant into the keyhole while turning the key.
 - Check if the mounting bolts are overtightened, which can cause binding. Loosen slightly if necessary.
- **Lock does not engage/disengage fully:**
 - Verify that the lock is correctly aligned with the door frame or strike plate.
 - Inspect for any obstructions preventing the bolt from extending or retracting completely.
 - Ensure the mounting bolts are secure and the lock is not loose.

If problems persist after attempting these solutions, contact Milenco customer support.

WARRANTY AND SUPPORT

Milenco provides a **5-year EU Spare Part Availability Duration** for this product, ensuring components are available for repairs or replacements within this period.

For further assistance, technical support, or warranty claims, please contact Milenco directly through their official website or customer service channels. Refer to the product packaging or Milenco's official website for the most current contact information.
