## 4. SAFETY INFORMATION

---

- **Voltage Compatibility:** This adapter is a plug adapter only; it does not convert electrical voltage. Your electronic devices must be dual voltage compatible (100-250V) for safe operation in Europe.
- **Check Device Labels:** Always check the voltage requirements on your device's surface or label before plugging it into the adapter. Look for input ranges like "100-240V" or "100-250V."
- **High-Power Appliances:** Devices such as hair dryers, curling irons, straighteners, and some CPAP machines often require a voltage converter, not just an adapter. Using these with only a plug adapter in a higher voltage region can cause severe damage to the device and pose a safety risk.
- **Indoor Use Only:** This product is intended for indoor use in dry conditions. Do not expose to moisture or extreme temperatures.
- **Avoid Overloading:** Do not exceed the maximum power rating of the adapter (2500W).
