- **Scanner Glass:** Clean the scanner glass with a soft, lint-free cloth and a mild glass cleaner.

- **Print Head Cleaning:** If print quality declines (e.g., missing lines, streaking), perform a print head cleaning cycle through the printer's maintenance menu on the touchscreen.

With so many options and features, choosing the right business printer can be tricky. **Here are four questions to help guide you in finding the printer that's best for your business.**

With so many options and features, choosing the right business printer can be tricky. **Here are four questions to help guide you in finding the printer that's best for your business.**

1

How to decide: Think about both convenience and volume of printing. Epson Supertank printers support high productivity and high capacity ink tanks so you can keep printing without worrying about running out of ink.

2

How to decide: If you print text documents often, such as reports and contracts, you might opt for a monochrome printer. On the other hand, if you print graphics, photos, presentations, and marketing materials, you'll need a color printer.

3

How to decide: If you need the printer for simple print jobs, a single-function printer will likely be sufficient. For high-volume printing, digitizing, and sharing documents outside of the company, a multifunction printer may give you the flexibility you need.

4

How to decide: Consider the size of your usual printing jobs as well as what future needs you might have and the types of materials you can create and print on your own.
