TOREVSITOR Hammock chair with stand-002

TOREVSITOR Hammock Chair with Stand

Model: Hammock chair with stand-002

Brand: TOREVSITOR

SAFETY INFORMATION

WARNING: Maximum weight capacity 350 lbs. Securely anchor hammock to stable supports. Be aware of your surroundings and potential hazards when using indoors or outdoors.

Always ensure the stand is placed on a flat, stable surface. Regularly inspect all components for wear or damage before each use. Do not exceed the maximum weight capacity. Keep children and pets supervised when near the hammock chair.

PRODUCT OVERVIEW

The TOREVSITOR Hammock Chair with Stand provides a comfortable and stable seating solution for both indoor and outdoor environments. Its unique U-type structure and double-tube design enhance stability and balance. The stand features a powder coating for weather resistance and a design that offers an unobstructed view. The included hammock chair is crafted from natural long-staple cotton, ensuring softness, durability, and comfort. An integrated side pocket offers convenient storage for personal items.

PACKAGE CONTENTS

Please verify that all the following components are included in your package:

- Hammock Chair Stand Components (U-type base, upright poles, top connector with hook)
- Cotton Hammock Chair
- Assembly Hardware (bolts, nuts, washers, Allen wrench)
- Instruction Manual

SETUP INSTRUCTIONS

Assembly of the TOREVSITOR Hammock Chair with Stand is designed to be straightforward and typically takes about 10 minutes. Follow these steps:

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, flat surface. Compare them with the 'Package Contents' list to ensure everything is present.
2. **Assemble the Base Frame:** Connect the U-shaped base sections using the provided hardware. Ensure all connections are finger-tight at this stage.
3. **Attach Upright Poles:** Insert the two upright poles into the designated slots on the assembled base frame. Secure them with the appropriate bolts and nuts.
4. **Connect Top Section:** Attach the top connector piece, which includes the hanging hook, to the upper ends of the upright poles. Secure firmly with hardware.
5. **Tighten All Connections:** Once the stand structure is complete, use the included Allen wrench to fully tighten all bolts and nuts. Ensure the stand is stable and does not wobble.
6. **Hang the Hammock Chair:** Carefully hang the cotton hammock chair onto the hook at the top of the stand. Ensure it is securely fastened.

Maintenance

Proper maintenance ensures the longevity of your hammock chair and stand:

- **Stand Care:** The steel stand is powder-coated for rust resistance. Clean with a damp cloth and mild soap. Avoid abrasive cleaners. For outdoor use, consider covering the stand during prolonged periods of harsh weather to further protect the finish.
- **Hammock Chair Care:** The cotton hammock chair can be spot cleaned with mild detergent and water. For deeper cleaning, hand wash with cold water and air dry. Do not bleach or tumble dry.
- **Regular Inspection:** Periodically check all bolts and connections on the stand to ensure they remain tight. Re-tighten if necessary. Inspect the hammock fabric and ropes for any signs of wear, fraying, or damage.
- **Drainage:** If used outdoors, be aware that the stand's hollow tubes may accumulate water. Consider drilling small drainage holes (approx. 1/8 inch) at the lowest points of the base if water accumulation becomes an issue, as suggested by user feedback.

Troubleshooting

Problem	Possible Cause	Solution
Stand feels wobbly or unstable.	Loose connections; uneven surface.	Ensure all bolts are fully tightened. Move the stand to a flat, level surface.
Difficulty during assembly (e.g., screws not fitting).	Misalignment of parts; manufacturing tolerance.	Ensure parts are correctly aligned before tightening. Apply gentle pressure or slightly adjust alignment. If issues persist, contact customer support.
Water accumulates in the stand's base when used outdoors.	Hollow frame design allows water entry.	Consider drilling small drainage holes (approx. 1/8 inch) at the lowest points of the base tubes to allow water to escape.
Hammock chair feels too high or difficult to get into.	Product design height.	This is a characteristic of the design. Ensure you have adequate space to safely enter and exit the chair.
