ARCORA 12-Inch Faucet Supply Lines Instruction Manual

Model: B09PFYLBX5

INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your ARCORA 12-Inch Faucet Supply Lines. Please read this manual thoroughly before installation to ensure proper function and safety.

PRODUCT OVERVIEW

The ARCORA 12-Inch Faucet Supply Lines are designed for connecting faucets to water supply valves in various applications, including kitchen sinks, bathroom sinks, and toilets. These lines feature a durable braided nylon exterior and a PEX inner tube, ensuring resistance to corrosion and leaks. They are equipped with 3/8-inch female compression and 1/2-inch brass nut connectors, and are cUPC certified and lead-free for safe water usage.

Video: This video demonstrates the various applications of the ARCORA faucet supply lines, showing their use with toilets, water heaters, basin faucets, and bathtubs. It also highlights key features like the braided nylon construction and easy installation.

SAFETY INFORMATION

- Always turn off the main water supply before beginning any plumbing work.
- Wear appropriate personal protective equipment, such as gloves and eye protection.
- If you are unsure about any step, consult a qualified plumber.
- Do not overtighten connections, as this can damage threads or sealing components.

PACKAGE CONTENTS

- 2 x ARCORA Faucet Supply Lines (12 Inch, 3/8" Comp x 1/2" Comp)

INSTALLATION INSTRUCTIONS

- 1. Prepare the Area:** Turn off the main water supply to the faucet. Open the faucet to drain any remaining water from the lines. Clear the workspace under the sink.
- 2. Remove Old Supply Lines (if applicable):** Use a wrench to carefully disconnect the old supply lines from both the faucet and the water supply valves. Be prepared for some residual water.
- 3. Determine Correct Length:** Measure the distance from the water supply stub out to the faucet's water inlet. It is recommended to add a couple of inches to this measurement to allow for flexibility. This product is 12 inches in length.
- 4. Connect to Faucet:** Hand-tighten the 1/2-inch brass nut end of the new ARCORa supply lines to the faucet's inlet shanks. Ensure the sealing washer is properly seated to prevent leaks. Use a wrench to tighten an additional 1/4 to 1/2 turn. Do not overtighten.
- 5. Connect to Water Supply Valves:** Hand-tighten the 3/8-inch female compression end of the supply lines to the water supply valves. Ensure the sealing washer is properly seated. Use a wrench to tighten an additional 1/4 to 1/2 turn. Do not overtighten.
- 6. Check for Leaks:** Slowly turn on the main water supply. Inspect all connections for any signs of leaks. If leaks are detected, gently tighten the connections until the leak stops. Do not overtighten.

3/8" Comp x 1/2" Comp Connector 12" Length

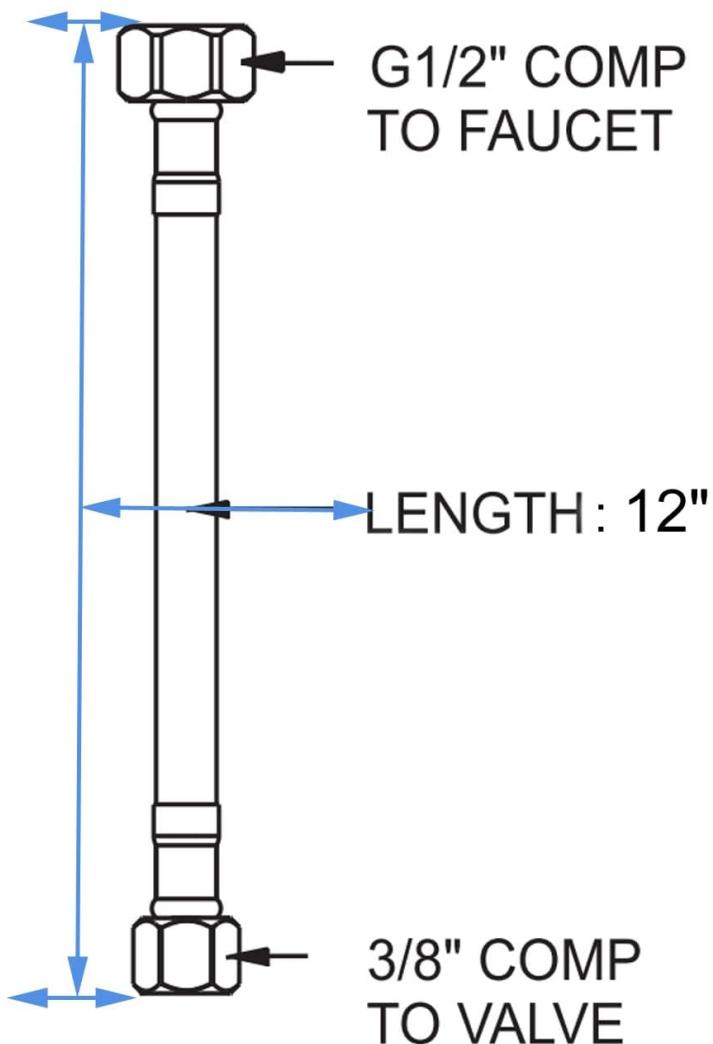

Image: A technical diagram showing the 12-inch length of the supply line, with the 3/8-inch compression end connecting to the valve and the 1/2-inch compression end connecting to the faucet.

Easy Installation

**Easily Connect To Toilet
Or Sink On You Own**

Image: An illustration demonstrating the easy installation of the supply lines connecting a faucet to the water supply valves under a sink.

OPERATION

Once installed, the ARCORA Faucet Supply Lines operate passively as part of your plumbing system. Ensure all connections remain tight and free of leaks for continuous, reliable water flow.

MAINTENANCE

Periodically inspect the supply lines for any signs of wear, corrosion, or damage. While these lines are designed for longevity, it is good practice to check plumbing connections during routine home maintenance. Clean the exterior with a soft cloth and mild soap if necessary.

TROUBLESHOOTING

- **Leakage at Connections:** Ensure all connections are properly tightened. Verify that the sealing washers are correctly seated and not damaged. Do not overtighten, as this can damage the washers or threads.
- **Low Water Pressure:** If water pressure is low after installation, ensure the water supply valves are fully open. Check for any kinks in the supply lines, although the braided design minimizes this risk.

SPECIFICATIONS

Feature	Detail
Brand	ARCORA
Model Number	B09PFYLBX5
Size	12 Inch
Color	Silver
Material	Brass, Braided Nylon, PEX Inner Tube
Connectors	3/8" Female Compression x 1/2" Brass Nut
Certification	cUPC
Item Weight	3.84 ounces (0.11 Kilograms)
Package Dimensions	10.28 x 7.76 x 0.67 inches
Included Components	Supply Lines 3/8" to 1/2" (1 Pair)

SUPPLY LINES

cUPC Certified Product

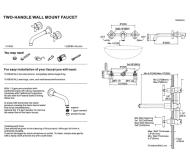

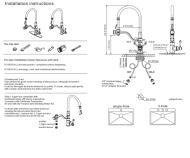

The supply lines meet U.S. and Canada high-quality standard (Uniform Plumbing Code), certified by IAPMO
