### OPERATING INSTRUCTIONS

- Magnetic Attachment (MagSafe Compatible Devices):** Align your MagSafe-compatible iPhone (12 series and newer) or MagSafe-compatible case with the charging pad. The magnets will automatically align the device for optimal charging.
- Qi-Enabled Devices:** Place your Qi-enabled device (e.g., Samsung Galaxy, AirPods) centrally on the charging pad. Ensure proper alignment for charging to initiate.
- Using the Kickstand:** The charging pad features a built-in kickstand. Extend the kickstand to prop up your device horizontally for hands-free viewing while charging.

## Hands-Free Viewing

Built-in kickstand allows you to prop up your phone horizontally to watch videos hands-free.

### TROUBLESHOOTING

- **Device Not Charging:**

- Ensure the charging pad is securely connected to the wall adapter and the adapter is plugged into a live power outlet.
- Verify your device is Qi-enabled or MagSafe-compatible.
- Adjust the placement of your device on the charging pad to ensure proper alignment with the charging coil.
- If using a phone case, ensure it is not excessively thick (over 3mm) or contains metal, which can interfere with wireless charging.

- **Slow Charging:**

- Confirm you are using the included 20W USB-C Fast Wall Adapter. Using a lower-wattage adapter may result in slower charging speeds.
- Ensure your device supports 15W fast wireless charging.
- Avoid using your device extensively while it is charging, as this can slow down the charging process.

- **Device or Charger Overheating:**

- Some warmth during wireless charging is normal. However, if the device or charger becomes excessively hot, discontinue use immediately.
- Ensure there are no foreign objects between your device and the charging pad.
- Remove your phone case to see if it improves heat dissipation.
