

morpilot ice maker

morpilot Ice Maker User Manual

Model: Ice Maker

INTRODUCTION

Thank you for choosing the morpilot Ice Maker. This appliance is designed to provide you with fresh ice cubes quickly and conveniently. Please read this manual thoroughly before operating your new ice maker to ensure safe and efficient use.

The morpilot Ice Maker is capable of producing 9 ice cubes in as little as 8 minutes, with a daily production capacity of up to 26 pounds (12 kg) of ice. It features a 1.5-liter water capacity and comes with a BPA-free plastic ice scoop and a removable ice basket. Its compact design makes it suitable for various settings, including homes, offices, and small businesses.

SETUP

1. **Unpack the Ice Maker:** Carefully remove the ice maker and all accessories from the packaging. Ensure all components, including the ice scoop and ice basket, are present.
2. **Placement:** Place the ice maker on a stable, level surface away from direct sunlight and heat sources. Ensure there is adequate ventilation around the unit.
3. **Initial Cleaning:** Before first use, clean the interior of the ice maker. Refer to the "Maintenance" section for detailed cleaning instructions.
4. **Add Water:** Open the lid and fill the water reservoir with clean, potable water up to the MAX fill line. Do not overfill.
5. **Connect Power:** Plug the power cord into a grounded electrical outlet.

User Friendly Design

OPERATING INSTRUCTIONS

1. **Start Ice Production:** After adding water and plugging in, press the "ON/OFF" button on the control panel. The "ICE MAKING" indicator light will illuminate.
2. **Ice Cube Formation:** The ice maker will begin the ice-making cycle. You can expect the first batch of 9 ice cubes in approximately 8 minutes.
3. **Monitoring Ice and Water:**
 - If the "ADD WATER" indicator light illuminates, it means the water reservoir is low. Add more water to continue ice production.
 - If the "ICE FULL" indicator light illuminates, the ice basket is full. The machine will automatically stop making ice. Remove ice from the basket to resume production.

4. **Infrared Detection:** The machine uses infrared detection to sense when the ice basket is full, automatically pausing operation for safety and efficiency.
5. **Collecting Ice:** Use the provided ice scoop to remove ice cubes from the basket. For best results, transfer freshly made ice to a freezer for storage, as the ice maker is not a freezer and ice may melt over time.
6. **Stop Operation:** To stop ice production at any time, press the "ON/OFF" button again.

9 Cubes in 8 Mins

MAINTENANCE

Regular cleaning and maintenance will ensure the longevity and optimal performance of your morpilot Ice Maker.

Automatic Cleaning Function:

1. Ensure the water reservoir is filled with clean water.

2. Press and hold the "CLEAN" button for a few seconds. The machine will initiate an automatic cleaning cycle.
3. Once the cleaning cycle is complete, the water from the internal reservoir will drain through the bottom drain of the machine.

Manual Cleaning:

1. **Drain Water:** When the machine is not in use, completely drain any remaining water from the reservoir using the drain plug located at the bottom.
2. **Wipe Interior:** Use a soft cloth dampened with mild detergent and water to wipe down the interior surfaces, including the ice basket and water reservoir. Rinse thoroughly with clean water.
3. **Dry Thoroughly:** Ensure all internal parts are completely dry before storing the machine or using it again. This prevents mold and mildew growth.
4. **Exterior Cleaning:** Wipe the exterior of the unit with a soft, damp cloth. Do not use abrasive cleaners or solvents.

One-Touch Self Cleaning Function

TROUBLESHOOTING

Problem	Possible Cause	Solution
Ice maker not turning on.	Not plugged in; power outage; faulty outlet.	Ensure power cord is securely plugged in. Check circuit breaker. Try a different outlet.
"ADD WATER" indicator is on.	Water reservoir is empty or low.	Add clean, potable water to the reservoir up to the MAX fill line.
"ICE FULL" indicator is on.	Ice basket is full.	Remove ice from the basket. The machine will resume ice production automatically.
Ice cubes are too small or not forming properly.	Water temperature too high; ambient temperature too high; insufficient water.	Use colder water. Ensure the machine is in a cool, well-ventilated area. Check water level.
Machine is noisy during operation.	Normal operation sounds (compressor, water pump); machine not level.	Some noise is normal. Ensure the machine is on a stable, level surface.
Ice has an unusual taste or smell.	Stagnant water; machine needs cleaning.	Perform a thorough cleaning cycle. Use fresh, clean water.

SPECIFICATIONS

- **Model Name:** Morpilot Ice Maker
- **Dimensions (L x W x H):** 28.3P x 22.4I x 30.8H centimeters (approx. 11.14 x 8.82 x 12.13 inches)
- **Weight:** 9.07 kg (approx. 20 lbs)
- **Power:** 120 Watts
- **Voltage:** 120 Volts
- **Water Capacity:** 1.5 Liters
- **Ice Production (per cycle):** 9 cubes
- **Ice Production (daily):** Up to 26 lbs (12 kg)
- **Refrigerant:** R600a
- **Material:** Plastic
- **UPC:** 810074384063
