6. MAINTENANCE

6.1 Emptying the Dust Container

Regularly empty the dust container to maintain optimal suction power. To empty, twist the dust container counter-clockwise to detach it from the main unit. Dispose of the collected debris.

6.2 Cleaning the Filters

The Oraimo OHV-102 features a dual filtration system. Both the stainless steel filter and the HEPA filter can be detached and cleaned. Gently tap the filters to remove loose dust or rinse them under running water. Ensure filters are completely dry before reassembling them into the vacuum cleaner.
